Via® AI
Reimagining what a hearing aid can do
Discover Via AI

The world’s first hearing aid that monitors brain and body activity, provides heart rate* information, and can detect if you’ve fallen and send an alert to your selected contacts. Using integrated sensors and artificial intelligence, Via® AI is a multi-purpose device that redefines what a hearing aid can do.

Most fitness tracking devices use the wrist, but the ear provides far more accurate data¹ – in fact, it’s the ideal spot for reliable tracking, and Via AI is the first-ever device to take advantage of that.

Via AI also features easy tap control and can translate up to 27 languages. Our voice-controlled Thrive™ Virtual Assistant can answer your questions on various topics. And if that’s not enough, it’s also our best sounding and best performing hearing aid ever.

*Coming soon for Via AI Rechargeable hearing aids with a custom Healthable receiver.
Thanks to a new technology we call Hearing Reality™, Via AI is designed to be effective in the noisiest environments. In fact, a recent independent study gave Via AI hearing aids the top rating compared to other manufacturers’ premium devices for reducing background noise in noisy listening environments.²

You’ll be able to hear speech more comfortably, even in a busy restaurant or coffee shop, while unwanted noises will be suppressed.

Via AI hearing aids work seamlessly with accessories and your favorite digital devices to help you connect to your world, and to:

- Deliver superior sound quality, listening clarity, more natural hearing and effortless transitions
- Preserve peace and quiet while amplifying the important things, and help you better understand conversations
- Stream phone calls, music and messages directly from your smartphone to your hearing aids
- Offer remote programming so your hearing care professional can make minor adjustments without an office visit
The connection between health and hearing

Hearing health is directly connected to overall health and well-being. That’s been proven, and it means people who are able to hear can engage with the world around them and live better and healthier lives.

Ever-increasing evidence also shows treatment of hearing loss with hearing aids can improve or limit some serious health issues such as cognitive decline and dementia.\(^3\)

Via AI lets people of all ages take a proactive approach to their overall wellness. Sensors inside the hearing aids detect movement, activities and different gestures. The hearing aids then communicate with each other, and with multiple accessories, to deliver meaningful benefits beyond traditional amplification.

You will not only hear better, but live better thanks to real-time feedback about your overall body and cognitive fitness.
Better hearing means better brain and body health

Easily monitor your body and brain health with your smartphone and the full-featured Thrive™ Hearing Control app.

Compatible with both Android™ and Apple® smartphones, the Thrive app provides you with a Body Score, a Brain Score and an overall score combining the two, called a Thrive Wellness Score.

**Body Score**

(100 points possible)

Walking at least 30 minutes a day can dramatically improve overall fitness and even reduce the risk of some serious medical conditions.

- Tracks your daily steps
- Monitors more vigorous activity
- Measures specific movement to encourage activity

**Brain Score**

(100 points possible)

Get the brain benefits of wearing hearing aids by tracking hours of daily use, social engagement and active listening.

- Tracks how long you wear your hearing aids every day
- Measures time spent in conversation and audio streaming
- Monitors hearing aid usage in a variety of environments such as home, restaurant, outdoors or listening to music

The combination of your body score and your brain score gives you a good indicator of your overall wellness.

**Thrive Wellness Score**

200 points possible

The combination of your body score and your brain score gives you a good indicator of your overall wellness.
What making better connections sounds like

Via AI intuitively connects to your Apple and Android devices via Bluetooth® technology and our easy-to-use Thrive Hearing Control app.

Thrive offers features designed to enhance your listening experience anywhere you go, and help you easily enjoy everything you do.

- **Body and Brain Health Tracking**
  Sensors are integrated into your Via AI hearing aids so you can track your brain and body activity via the Thrive app.

- **Thrive Virtual Assistant**
  You can conveniently troubleshoot hearing aid and accessory issues and ask a question like, “How do I customize my hearing aid settings?”

- **Fall Alert**
  With integrated sensors, Fall Alert can detect falls and send alert messages to selected contacts.

- **Heart Rate**
  Using the Thrive app you can view your heart rate and see your heart recovery rate.

- **Hearing Care Anywhere™**
  Request adjustments from your hearing care professional who can then make them remotely so you don’t need to make an appointment and stop in.

- **Self Check**
  Allows you to perform a diagnostic test of your hearing aid components.

* Coming soon for Via AI Rechargeable hearing aids with a custom Healthable™ receiver.
Transcribe
It’s like closed-captioning for real life. Conversations are transcribed so you can read what’s being said.

Language Translation
Easily communicate with people who speak other languages via the easy-to-use translation tool in your Thrive app. (Requires an internet connection.)*

Personalized Memories
Create custom memories, including geotagged memories where your hearing aids will adjust automatically when you return to those locations.

Auto Experience Manager
Automatically adjusts your Via AI hearing aids’ loudness over time to help you transition to your new hearing experience in the most comfortable way possible.

Siri Integration
You can have Siri* read texts and emails directly to your Via AI hearing aids.*

Find My Hearing Aids
Easily locate lost hearing aids using the Find My Hearing Aids feature, with both a location and timestamp. A signal detector sends a stronger or weaker signal based on how close you are to locating your Via AI hearing aids.

Personalized Control
Make personalized, real-time adjustments to suit your preferences in different listening situations.

Phone Calls
Answer your calls with the touch of a button and hear an entire conversation streaming directly to your Via AI hearing aids via Bluetooth® technology.**

Adaptive Car Mode
With Adaptive Car Mode, Via AI hearing aids will automatically change to a setting designed to reduce the annoying sounds of driving and enhance your overall driving experience.

Remote Control
Using the remote control feature in the Thrive app, you can change volume and switch memories on your hearing aids right from your smartphone.

Language Translation
Easily communicate with people who speak other languages via the easy-to-use translation tool in your Thrive app. (Requires an internet connection.)*

Phone Calls
Answer your calls with the touch of a button and hear an entire conversation streaming directly to your Via AI hearing aids via Bluetooth® technology.**

Remote Control
Using the remote control feature in the Thrive app, you can change volume and switch memories on your hearing aids right from your smartphone.

* Only available with Apple devices.
** Remote Microphone + is required for Android devices.
Rechargeable hearing aids: smart, convenient, reliable

Via AI hearing aids are the only rechargeable hearing aids enhanced with integrated sensors, artificial intelligence and Healthable™ technology.

- Smallest Healthable rechargeable hearing aid
- Delivers 24* hours of superior hearing on one charge
- The only rechargeable Receiver-In-Canal hearing aids with telecoil, making it compatible with sound systems often found in places with lots of background noise, such as a church or lecture hall

Via AI rechargeable hearing aids are available only in the RIC R style and come with a charger (shown here).

A Mini Turbo Charger is also available for purchase (not pictured). Ask your hearing care professional for more details.

*Results will vary based on wireless and feature usage.
Enjoy universal connectivity with wireless accessories

Our hearing aid accessories are powered with wireless connectivity to help users fully engage with the world around them.

**TV**
Stream audio from your TV or other electronic audio source directly to your Via AI hearing aids. It offers excellent sound quality, is easy to use and supports both analog and digital input sources.

**REMOTE MICROPHONE +**
Easily stream from a variety of audio sources. And thanks to Remote Microphone +, Via AI is the first hearing aid to feature Amazon™ Alexa connectivity.

**MINI REMOTE MICROPHONE**
Enjoy one-on-one conversations in noisy environments with our small, easy-to-use Mini Remote Microphone. Clip it onto the clothing of the person you’re talking to, or use it as a TV streamer by placing it near the sound source.

**REMOTE**
Our remote includes updated features so you can control memory and volume, mute your hearing aids and turn other special features on and off.
What living better sounds like

To hear comfortably in challenging environments:
With Hearing Reality, Via AI is effective in even the noisiest environments, comfortable in loud settings, and quiet in quiet settings. And you’ll also enjoy newly enhanced speech clarity.

To live a more active and healthy life:
Via AI is the first hearing aid ever to include integrated sensors so you can easily track your body and brain health activities.

The convenience of adjustments on the go:
You can easily adjust your Via AI hearing aids anytime, anywhere with the Thrive app.

A solution for single-sided hearing loss:
Enjoy great sound quality, clarity and consistency with new CROS technology that allows streaming between your hearing aids.

Better wireless streaming:
New technology provides consistent wireless performance through your smartphone or wireless accessories while streaming phone calls, TV, music and other media.

Hearing that happens intuitively:
Geotagged memories that automatically switch modes when the GPS feature in your smartphone detects you are in a tagged location. For example, a “home” memory activates when you arrive at home.
Hearing that’s personalized for you: Personalized Control in the Thrive app that lets you make adjustments to suit your preferences in different listening environments.

Music the way it was meant to be heard: A whole new way to experience music - adjustable via the Thrive app. Now you can hear every note the way the artists intended – with pure, refined sound quality.

No buzzing or whistling: Audibel’s best-in-class feedback cancellation system providing feedback-free, comfortable listening all day long.

Durable, dependable hearing aids: Surface™ NanoShield, our pioneering water, wax and moisture-repellent system, protects and ensures durability and dependability.

Customizable tinnitus relief: Advanced Multiflex Tinnitus Technology, adjustable via the Thrive app, brings relief to those who suffer from ringing in the ears.

Behind-The-Ear
Our Founder and CEO, Bill Austin, has always held a strong belief that the gift of better hearing results in a fuller and richer life.

We prove our dedication to this philosophy daily, through our support of Starkey Hearing Foundation.

The gift of hearing opens up new worlds of opportunity. It connects individuals to life and helps them realize they can accomplish more than they ever thought possible. Starkey Hearing Foundation uses hearing as a vehicle to change lives around the world.
What continuous innovation sounds like

We don’t do technology for technology’s sake. From the technicians in our labs to the scientists, audiological researchers and every employee at every level, we continually seek ways to better understand the science of hearing loss and its impact on people’s lives — so we can continually develop better technologies to improve it.
