The Dental Clinic Ministry of NC Baptist Men provides a means for free dental care to be offered to residents of North Carolina. Approximately 3,500 people are treated annually through this ministry in over 100 locations throughout the state. The dental clinics are sponsored by Baptist associations, local churches or civic organizations. This ministry offers Christians the opportunity to provide physical and spiritual care to people in need. Patients targeted through this ministry include people without insurance, the impoverished, Hispanic and other ethnic groups, the homeless, the elderly and more. Dental treatments include fillings, extractions, and hygiene care only. Local dentists, dental assistants, and hygienists are recruited to volunteer their services at the clinics. The dental ministry is funded by donations from individuals and groups who see this ministry as a way to reach people for Christ. For more information about this ministry, check out the NC Baptist website and look for the medical/dental clinic information under ministries: www.ncmissions.org

Patients with artificial limbs or heart surgery, who need to take an antibiotic prior to treatment, must contact their physician to get that antibiotic prior to the dental clinic.

Patients who take a blood thinner such as COUMADIN need to avoid taking that medication prior to the clinic. (Check with your physician)
