## About the FullInsite Report

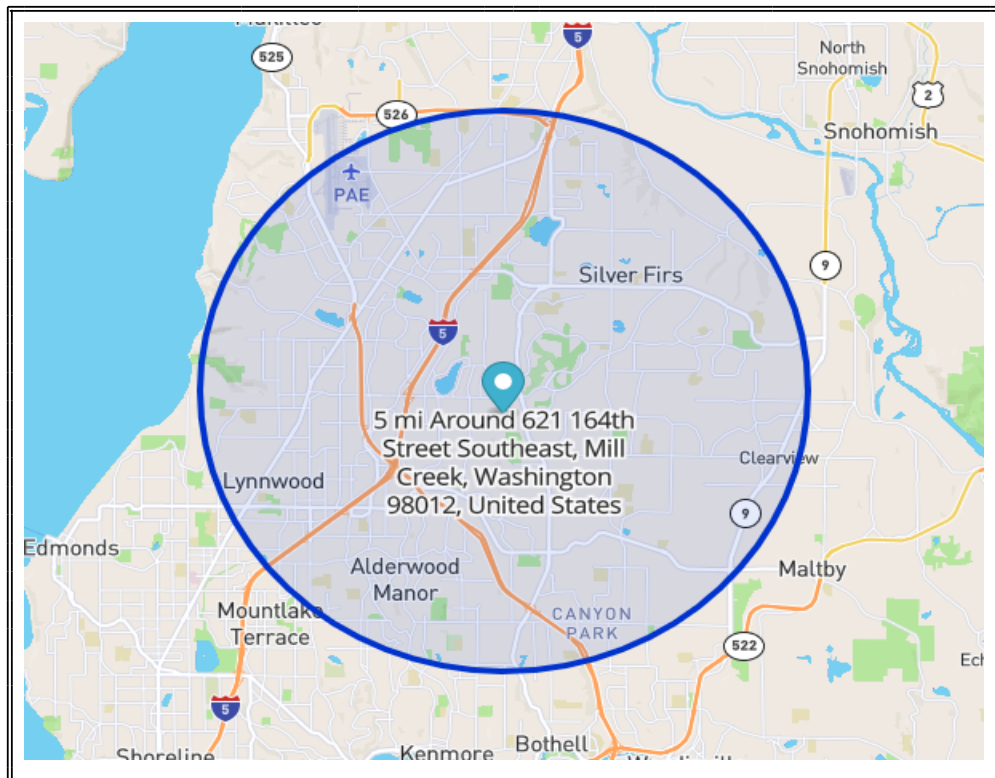

The FullInsite report is designed to provide an extensive demographic portrait of a user defined geographic area. The FullInsite integrates the full array of 2010 Census Data, the latest American Community Survey data and the new Experian Mosaic cluster system!

The FullInsite report is divided into three sections, each providing a different approach to the data. Careful consideration is given to readability and graphic treatment. The hope is that the information it presents will be more accessible to the reader.

## Three Sections

- The **StoryView** Report presents 9 demographic indicators of your study area.
- The **TrendView** provides four graphs that reflect the more significant demographic trends that will shape the study area in the 5 to 10 year future.
- The **ThemeView** Report provides a wealth of demographic detail across six themes: People, Households, Families, Diversity, Housing and Work.

## Mortgage Risk Indicator

The Mortgage Risk Indicator indicates the assessed level of risk based upon debt to income. The higher the debt to income, the greater the risk. The values are used by mortgage lenders in the loan process.

## Work

The Work theme expresses several different ways of looking at the work people do within the study area.

# Supporting Information

## Interpreting the Report

The FullInsite report is formatted to help you interpret data at a glance.

**Change over time:** Several trend tables have a column indicating a change over time. Generally, these tables begin with the last census, include the current year estimate, a five year projection and if available, a 10 year forecast. The data in each cell represents a percentage change up or down.

**Color Coding:** Both the "Change over Time" and "Comparative Indexes" columns are color coded to easily spot any change and the direction of that change.

Change:	Increasing	Stable	Declining
Index:	Above Ave	Ave	Below Ave.

## Variable Definitions

Full variable definitions can be found in the MI Demographic Reference Guide. Download it free from the Help/Documents menu located on the map screen of your study area on the MissionInsite website.

**Indexes:** Some variables will have a column called "Comparative Index." An index is an easy way to compare a study area with a larger area. For this report, all comparisons are with the state or states within which the study area falls. The indexes can be interpreted as follows.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.
