

## BULL "SPIRIT" CREEK UPDATE

Dear WellSpringer,

This greeting is more than a platitude. My heart is full with an awareness of how important the community of God is and how valuable a praying church is.

Although I don't have many details at this time, I wanted to share an update as I know you have been praying along with the entire WellSpring family about seeing the Lord's purposes fulfilled regarding the County's Bull Creek water reclamation project.

We made a good step forward at the meeting with LA County this morning. We see a willingness on the part of the county to not completely disrupt the efforts we're making to impact our community as well as the efforts of the preschool.

But we are not done! We are committed to press forward to see a better solution reached than what is currently on the table.

With that in mind, please continue to pray fervently for the will of God to be accomplished.

I would like to ask that you do battle in the Spirit with regard to the prayer points I wrote to you about previously. In case you didn't see that email here they are again...

- Pray we will have favor with all the decision making people.
- Pray they would choose to do the project in a completely different area of Bull Creek and the city.
- Pray the Bull Creek project would not divert or drain off any more kingdom resources.
- Pray I would communicate on behalf of the Lord and our community in ways that honor the Lord and advance His purposes through us.
- Pray we would be a refreshing to the county representatives in such a way that we would help them discover a personal relationship with Jesus.

Believing Jesus for the full victory,

Pastor Scott

PS Thanks for all the people emailing and texting to let us know you're praying!!
