

# Daily Home Screening for Students

**Parents: Please complete this short check each morning and report your child's information [INSERT YOUR SCHOOL REPORTING INSTRUCTIONS] in the morning before your child leaves for school.**

## SECTION 1: Symptoms

If your child has any of the following symptoms, that indicates a possible illness that may decrease the student's ability to learn and also put them at risk for spreading illness to others. Please check your child for these symptoms:

<input type="checkbox"/>	Temperature 100.4 degrees Fahrenheit or higher when taken by mouth
<input type="checkbox"/>	Sore throat
<input type="checkbox"/>	New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
<input type="checkbox"/>	Diarrhea, vomiting, or abdominal pain
<input type="checkbox"/>	New onset of severe headache, especially with a fever

## SECTION 2: Close Contact/Potential Exposure

<input type="checkbox"/>	Had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with confirmed COVID-19
<input type="checkbox"/>	Traveled to or lived in an area where the local, Tribal, territorial, or state health department is reporting large numbers of COVID-19 cases as described in the <a href="#">Community Mitigation Framework</a>
<input type="checkbox"/>	Live in areas of high community transmission (as described in the <a href="#">Community Mitigation Framework</a> ) while the school remains open

**Individual is NOT a known close contact to a COVID-19 case:**

**Individual Symptomatic**

**Not tested for COVID-19**

- The individual must remain home for at least 10 days since the first symptoms began AND be fever free without the use of fever-reducing medications for 24 hours AND with improvement of symptoms.
- Siblings and household members should follow the close contact chart below for exclusion.
- If diagnosed with another condition that explains the symptoms, such as influenza or strep throat, no isolation or quarantine of close contacts is necessary. Follow guidance from the health care provider and exclusion period of the diagnosed disease as listed on the [Wisconsin Childhood Communicable Diseases Wall Chart](#).

**No Symptoms**  
May attend school.

**Tested and negative for COVID-19**

- The individual must be fever free for 24 hours without the use of fever-reducing medications
- If diagnosed with another condition, the individual must complete the exclusion period for the diagnosed disease as listed on the [Wisconsin Childhood Communicable Diseases Wall Chart](#). An alternative diagnosis is not required.

May attend school.

**Tested and positive for COVID-19**

- The individual must isolate at home for at least 10 days since the first symptoms began AND be fever free without the use of fever-reducing medications for 24 hours AND with improvement in symptoms. Repeat testing is NOT recommended for making decisions about when people can return to work or school.
- Siblings, household members, and other close contacts should follow the close contact chart below.

- Must isolate at home for 10 days after the day the sample was collected.
- Siblings, household members, and other close contacts should follow the close contact chart below.

**Individual IS a known close contact to a COVID-19 case:**

**Individual Symptomatic**

**Not tested for COVID-19**

- The individual must quarantine for 14 days after the last contact with the COVID-19 positive person. If the exposure is to a household member and the case cannot properly isolate away from others at home, the last date of contact may be the last day of isolation for the case.
- The individual must also remain home for at least 10 days since the first symptoms began AND be fever free without the use of fever-reducing medications for 24 hours AND with improvement of symptoms.
- **The criteria in both of the above bullets must be met before returning to school.**
- Siblings, household members, and other close contacts should also follow this chart to determine quarantine length.

**No Symptoms**

Must quarantine for 14 days from the date of last exposure before returning to school or day care. If the exposure is to a household member and the case cannot properly isolate away from others at home, the last date of contact may be the last day of isolation for the case.

**Tested and negative for COVID-19**

- The individual must quarantine for 14 days after the last contact with the COVID-19 positive person. If the exposure is to a household member and the case cannot properly isolate away from others at home, the last date of contact may be the last day of isolation for the case.
- The individual must also be fever free for 24 hours without the use of fever-reducing medications AND if diagnosed with another condition, they must complete the exclusion period for the diagnosed disease as listed on the [Wisconsin Childhood Communicable Diseases Wall Chart](#). An alternative diagnosis is not required.
- **The criteria in both of the above bullets must be met before returning school.**

Must quarantine for 14 days from the date of last exposure before returning to school or day care. If the exposure is to a household member and the case cannot properly isolate away from others at home, the last date of contact may be the last day of isolation for the case.

**Tested and positive for COVID-19**

- The individual must isolate at home for at least 10 days since the first symptoms began AND be fever free without the use of fever-reducing medications for 24 hours AND with improvement in symptoms. Repeat testing is NOT recommended for making decisions about when people can return to work or school.
- Siblings, household members, and other close contacts should also follow this chart to determine quarantine length.

- Must isolate at home for 10 days from the day the sample was collected.
