

## New Salem-NC

Mae Home: Concrete Work, Carpentry, Ceiling Boards, Landscaping, Adobe Production  
December 2019

This week we finally obtained molasses and we put New Salem to work on the first adobe blocks for the Mae House. The team was led by Pamela Chavez. They helped to get the form work up for a critical part of the concrete roof drainage system, prepared lumber for ceiling and roof, prepared the adobe drying area, and then made our first adobes for the year. In addition to the Mae Home work, they did chores around the Center, including reworking the beds for the roses.

We are thankful to God for NC Baptists on Mission and New Salem for advancing the new Children's home construction. This was New Salem's first mission trip and we are delighted that they have made a strong relationship with us and this ministry.
