Bubbles, balloons, and balls were fun to play with when you were young. See how they can be just as intriguing to aspiring engineers. Explore the properties of bubbles and create the longest lasting, largest, and most interestingly shaped bubbles. Design air balloons for lifting payloads off the ground. Investigate the physics that allow balls to bounce the highest or be thrown the furthest. What features make a ball ideal for a sport? How might you design a ball for a new sport? Finally, use your spherical discoveries to “break out” of camp in a game at the end of the week. Register online at [www.cuw.edu/steam](http://www.cuw.edu/steam)
