

Cold & Flu Season Reminder

Cold and flu season is on the rise and ever present. Please take a moment to review TRC's illness policy BELOW for Radical Kids. In addition to the policy, please remember that if your child is not well and you decide they sit with you in church, please keep them with you. The infant nursing room is NOT an option for you and your child to hang out in during church. Thank you for helping keep our little ones as healthy as we can over the next several months.

TRC Radical Kids ILLNESS POLICY

While we value every opportunity to minister to children and their parents, for the comfort of ill children and for the health of other children and workers, we ask that you not put them in the nursery or children's functions if they exhibit signs of illness. It is possible for a child to unknowingly expose other children and workers to an illness.

Children showing signs of an illness should be cared for at home. Children should be free of fever for 24 hours and past the stage of contagiousness for their illness before being brought to church nursery or children's facilities. Parents of children who appear to develop symptoms during a church session will be summoned. The parents will be expected to come immediately for the child.

Compliance with these policies is necessary to assure the health and safety of all children and workers. We thank you for your cooperation.
