typing
a teaching.com product

Welcome to

Dear Parents,

We will be using Typing.com, an online typing tutor, to teach your child about proper touch-typing techniques and improve their keyboarding skills.

On Typing.com, your child can practice and master the keyboard one lesson at a time. It allows them to pick up where they left off in the course and displays a keyboard and hand diagram as they type to reinforce proper finger placement.

Once your student has created or has logged into an existing account, s/he can access Typing.com from any computer (with an internet connection and modern web browser). From the teacher account, I can monitor and review your child's progress and track important statistics like typing speed, accuracy, and time spent typing.

Please use the login below to access our class and so that I can monitor the students' progress over the summer. Even if they're already proficient typists, this program will help them review their skills. **I expect that they'll have completed the Beginner and Advanced modules (about 25 lessons) by the first day of school.** I look forward to a great year as we incorporate the use of technology into our curriculum. If you have any questions, please contact me: k.guerra@lccademy.org.

Student Log-In or Create an Account:

Go to the link below and either link your current account or create a new account. Then join the class you will be in this fall (6th, 7th, or 8th grade):

<http://www.typing.com/student/join#Lighthouse2018>

If you already have an account, log on, and then click "Join Classroom" with this code: **Lighthouse2018**
