

BCCP (BREAST AND CERVICAL CANCER PROJECT)

The Northwest Region Breast and Cervical Cancer Project (BCCP) is a high-quality breast and cervical cancer screening and diagnostic program offered at no cost to eligible women in Ohio. In 2016, the Ohio Department of Health merged ten regions down to five, and we are now serving a total of 21 counties. Eligible women can still receive a no-cost pelvic exam, pap test, clinical breast exam, mammogram, and diagnostic testing if needed. A new component to the program in 2016 is Patient Navigation, which is offered at no-cost, and has no eligibility guidelines. Our patient navigators provide individualized support and assistance to help women overcome any barriers that may impede their access to breast and cervical screenings.

NW Region Breast & Cervical Cancer Project

In the first six months of the program, **137** women have been enrolled, resulting in the NW Region Breast and Cervical Cancer Project to be **ranked 1st in Ohio** for patient navigation services.

The NW Region BCCP is also **ranked 1st in Ohio** for their extensive networking with local providers. Meeting with **63%** so far this year.

During the past six months our office enrolled **120** new clients into BCCP direct services, and provided a total of **798** direct services for those women currently enrolled.
