

# CHILDREN WITH MEDICAL HANDICAPS (CMH)

Children with Medical Handicaps (CMH/BCMh) is a program of the Ohio Department of Health and can benefit children with a qualifying chronic medical condition (treatment program) or a suspected chronic medical condition (diagnostic program). Public Health Nurses assist families with the application process, health education, case management and referrals to local resources.

Since January 1, 2012 until January 1, 2017, the number of children active on the CMH (BCMh) diagnostic, treatment, or service coordination program has steadily increased from 90 to 196 children. There has been an increase in referrals to the program from agencies, physician offices and word of mouth in the community. Case management services are offered to these families and are determined by the family's needs.
