Guidelines for Quarantine after Exposure

This chart can help guide decisions after an individual is exposed to someone with COVID-19.

This does **NOT** apply to K-12 classroom settings.

*Individuals do not need to quarantine if they have had a positive viral (PCR or antigen) COVID-19 test within the last 3 months, have recovered, and are asymptomatic.

**Information is up-to-date as of 8/18/2021 but is subject to change based on CDC or ODH guidance.
