

Apple computer

(please note: **you will only be able to join a Zoom meeting on a computer with Speakers**; additionally, you will only be able to **participate** on a computer with a Microphone; you will only be **seen** in the meeting on a computer with a Video Camera)

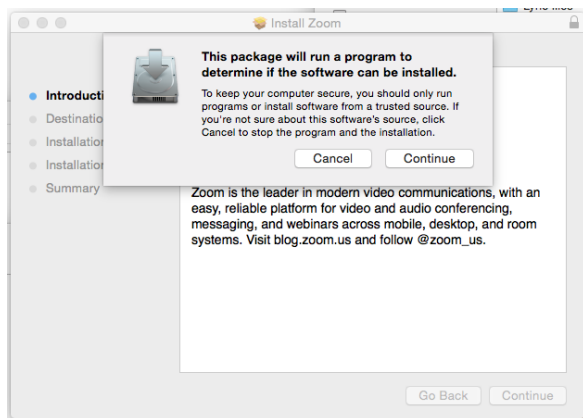

1) click the email or website link for our Zoom Gathering; this will take you to a Web page which looks like this:

2) click **“Download and run Zoom”**

3) go to your Downloads folder, find the file **“Zoom.pkg”** and double-click to open

4) this will open a screen like this:

5) click **“Continue”**; this will install and open the Zoom program

6) press **“Join a Meeting”** (you **DO NOT** need to “sign up” or “sign in”!)

7) enter **“2559916569”** (the number in the link we emailed) in the space for “Meeting ID” and click **“Join”**

(In the future, you will only need to click the link in the email... it will directly connect you through the Zoom software that you have now set up.)

8) as you enter the meeting, you are presented a window where you can select **“Join With Computer Audio”**

9) you can now hear the meeting and will see options at the bottom of your screen to “Mute/Unmute” your microphone (if computer includes Microphone) as well as “Start Video/Stop Video” (if computer includes Video Camera)

*for optimal sound quality for the meeting group, we encourage being muted- *and we can mute you remotely*- until you may desire to participate
