

Hearts in Action: Blood Drive Support

Give the gift of life this July by donating blood to help patients in our community. We are encouraging church members, friends, and neighbors to support the ongoing need for blood donations by visiting the South Bend Medical Foundation blood donation center on Ireland Road during the month of July.

Blood donations help provide lifesaving care for accident victims, surgery patients, cancer treatments, and many others in need. Summer months often bring blood shortages, making every donation especially important.

Whether you are a regular donor or giving for the first time, your donation can make a real difference in someone's life. We invite our church and community to come together in this simple but powerful act of compassion and service.
