What We Are Learning

Social & Emotional Development - This area is our main focus for the star of the year. All Children need to first feel safe, secure and cared for before they are able to grow cognitively. We will be working on this by getting to know our new room and routines, building relationships with peers and teachers, and through positive reinforcement for kindness, helpfulness, confidence, and other positive behaviors.

*Through fun activities and games we will be assessing areas such as Math, Language, Literacy, Fine and Large motor skills. This will give me a better understanding for each child's needs in order to best develop lessons for fun creative learning.
