

About Us:

Matt is a quality assurance director for a food processor, he likes to say that throughout his career he has helped to produce every type of food on your plate. Emily is a Speech-Language Pathologist, she works in local schools and specializes in alternative forms of communication working with children with severe special needs.

We both see family as the center of our world. We both have large extended families. Many of our family members live close to us and we get together often for events big and small. We have 2 dogs, Pip Squeak and Hazel, they are very fun and love children.

In our free time we enjoy spending time at the lakes near our home, it is not uncommon for us to rent a boat or other water toys for a weekend at the lake. We love to camp too. We enjoy regular weekend getaways to the coast or mountains near our home. We also enjoy regular lazy weekends around our home, watching movies, listening to music, and just spending quality time together. We hope that we can enjoy these things with our children someday.

We thank you for looking at our online profile and hope that you will consider viewing our full profile to get to know us better!
