

Problem: Can no longer “Save” videos or audios downloaded from Shiloharpchurch.org – if using “Internet Explorer” and “Media Player” (can’t “Rename” them either – so, can save in a “List”, but it will be overwritten the next time you download another video or audio. See below for a solution.

Screenshot of “Live” Website (using default “Internet Explorer” browser & “Media Player”, after clicking on “Resources”, then “Download This Media” & when another, smaller window opens with the video in it, then Right-Clicking inside that small screen - - there is no “Save” option - - not even a “Rename” option (so, if you download another one, it will “over-write” the previous one). (It appears that you are given a “link” to the file – on their server – and it will then “stream” to your computer when you click on it,)

One Solution: After clicking on “Resources”, then “Right-Click” on “Download This Media”. In the resulting box, click on “Save target as ...”

The screenshot shows a web browser interface with a video player. The video player is paused, showing a church interior with a pulpit and a floral arrangement. A right-click context menu is open over the video player, with the option "Save target as..." highlighted by a red rectangle. Below the video player, there is a section titled "How Can These things Be" with a date of February 11, 2018, and a duration of 20 min. A blue button labeled "DOWNLOAD THIS MEDIA" is visible, along with a "RESOURCES" link. Below this, there is a "Media Archive (16)" section with four dropdown menus labeled "Date", "Series", "Speaker", and "Title". The bottom right corner of the browser shows a zoom level of 100%.

After clicking on “Save target as...”, a new small window will open with the “Downloads” folder showing & the file name “480p” (or something similar) highlighted. You definitely need to rename the file and can save it in Downloads or choose another folder - - then click “Save”. Now you can leave the website – or select another video or audio to download and save.

Another Solution: Rt-Click on the website “link” (shiloharpchurch.org), open a “Chrome” browser and paste it in the “address bar” (at the top of that screen). You should then be able to download, save/save-as the videos or audios.

Screenshot after clicking on “Resources”, then “Download This Media” and then clicking on the “down-arrow” on the Rt. Side of the “white bar”, below the video - - then clicking on the “^” or “v”, at the bottom, left-hand side of the screen - - then click on “Open” (which takes you to the next screenshot).

Screenshot after clicking on “Open” in previous dialog box, then Rt-Clicking in the video box. Then click on “Save Video As ...” (or Audio, if just an audio file) then give it a name and “Save” it where you want to.
