

**Director of Worship Ministries  
Board Report- June 2026**

**Wins**

- The Student Team is scheduled to be our main worship team on August 9th. I'm excited for them to lead another service.
- Worked really hard to rebuild team structures especially with our new volunteers/recruits. Going well so far.
- Christmas plans are moving forward extremely well and that has been a huge weight off of my shoulders/has made it more fun than it was last year.
- So many minor sound improvements that may not be inherently noticeable, but they are making a big difference overall and we are learning a lot and making headway on things we have been struggling with previously. Still working on/towards consistency, but we are still heading in the right direction.

**Ministry Challenges I'm Facing**

- No one thing in particular. Just day to day and working through some things personally.

**Goals for the Next 30 Days**

- Get certified and Install new Aviom Dante distributor. and list our old one for sale. (Still working on certification. It's a lot of information to handle.)
- Schedule Night of Worship for fall in November, possibly coordinating with Dan Lawrence to integrate/facilitate.
- Research integrating a computer DAW system for our livestream instead of hiring someone to do it.
- Coordinate with Clint Lucas to see options for repositioning/hide speakers on the platform.
- Working on outdoor service for August.
