Convention Center Rigging Services

■ Rigging To Fit Your Needs

The safety of your facility and your attendees is critical. At PSAV® Presentation Services, we know and understand Convention Center rigging better than anyone else and our comprehensive and flexible services for the production and tradeshow environments are designed to protect both you and your clientele.

■ Peace of Mind Planning

Rigging for any event relies on successful planning. PSAV employs ETCP certified rigging supervisors to manage the planning process so you can rest assured what is being suspended over your attendees is within the safe limits of your venue. Our fast and easy online ordering process simplifies the planning process, creating a “rigging friendly” environment that planners and production companies appreciate and seek for their events.

■ Certified & Trusted Resources

Event rigging requires dependable, certified inventory done by employees who know your venue and have the credentials to back it up. Don't take a chance on unknown equipment from the back of a truck and labor from an unrecognized source. At PSAV, our in-house inventory is professionally maintained, annually inspected and certified to ensure safe working operation. Our dedicated rigging training facility and program in Elgin, IL is led by ETCP certified riggers and assures the PSAV rigging team has the expertise and knowledge needed.

■ Installations & Design

PSAV has installed and maintains more than 10,000 permanent point systems in venues across the country. From small ballroom installations to major arena overhauls, PSAV is a partner you can count on to develop a plan for your facility that will improve client safety, improve rigging efficiency and generate repeat business. With zero failures, our industry leading inspection and maintenance process ensures safe and reliable operation year after year.
