This bucolic 33+ acre Woodford County farm is an ideal retreat.

Located just one mile off Troy Pike (KY 33), it welcomes visitors via a shaded, tree-lined driveway. A 4BR brick residence offers two bedrooms on the main level, along with a sunny living room and eat-in kitchen. The unfinished basement has ample space for storage and mechanicals as well as a two-car garage. Covered porches on both the front and back of the home beautifully frame sweeping views of the countryside.

The farm is mostly wooded with some open space along Fords Mill, ideal for a field or paddocks. Within the woods are countless mature trees, a pond, and wonderful opportunities for future hiking or riding trails. Also: a useful barn with room for stalls, metal Quonset building, and a 3BR/2BA manufactured home.

The soil surveys that comprise your AOI were mapped at 1:20,000.		Warning: Soil Map may not be valid at this scale.	
Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.		Please rely on the bar scale on each map sheet for map measurements.	
Source of Map: Natural Resources Conservation Service Web Soil Survey URL: Coordinate System: Web Mercator (EPSG:3857)		Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.	
This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.		Soil Survey Area: Jessamine and Woodford Counties, Kentucky Survey Area Data: Version 20, Aug 30, 2024	
Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.		Date(s) aerial images were photographed: May 8, 2019—Aug 11, 2019	
The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.
