Heritage

Dufont dates from 1784 when original owner William Stuart Hunter acquired 7,000+ acres through a Virginia land grant. Nestled close to town, the estate has been a much-admired social hub & productive farm since its earliest days.

Imbued with the spirit of its generations, Dufont's continued vitality has been fostered by an engaged family. These descendants included educators, bankers, veterans, entrepreneurs, farmers, and adventurers, each making a mark on their ancestral land.

Like its inhabitants, Dufont contains multitudes. Some Woodford Countians remember Dufont as the site of a candy business and its rare pool as the location where many local children first learned to swim. Today, as in yesteryear, Dufont remains a productive working farm.

Location & Soils

In addition to its remarkable history, Dufont distinguishes itself with its location and fine soils. The farm abuts storied Thoroughbred nurseries Brookdale and Stonestreet, and neighbors Coolmore at Ashford Stud and Godolphin at Gainsborough Farm. Its 248± acres include extensive road frontage on both McCracken Pike and US-60.

Long used for crops and livestock, the farm is enhanced by natural springs and dozens of mature, Kentucky native trees. The majority of the farm's soil is Maury Silt Loam, prized for its rich composition and considered perfect for grazing. More than 98% of the farm is rated as "prime farmland" or "farmland of statewide importance" by the USDA.

A Fine Residence & Amenities

Down a winding drive, a ca. 2010 custom Kentucky farmhouse stands. The residence was thoughtfully constructed with heritage in mind. Utilizing materials from a prior home on the farm, it includes Kentucky limestone and reclaimed brick. Warm and inviting, its quiet simplicity provides an ideal backdrop for family gatherings. Wood reclaimed from a tobacco barn and warehouse perfectly frame the living spaces, while conveniences like geothermal HVAC and a Generac generator add modern comfort. Welcoming outdoor porches, including a screened-in porch off the kitchen, connect the home with its surroundings.

Directly adjoining the main residence are a historic train car and in-ground pool.

Further living space is found in the main residence's historic guesthouse, separate farm manager's home, and two residences located at 131 & 133 Camden Avenue – all included in this offering.

All of the information contained herein is deemed reliable but is not warranted; all figures, facts and boundaries are believed to be accurate but independent verification is strongly advised. Square footage measurements & school district information is believed to be accurate but independent verification is strongly advised. The listing broker or broker associates recommend interested parties, prior to closing, perform a complete property inspection (including but not limited to environmental assessments and percolation tests as may be necessary for BUYER'S intended use of the property) have the land surveyed by a licensed surveyor, the title searched and inspected by an attorney and any and all legal questions or concerns directed to legal counsel. The broker or broker associates will not advise on matters outside the scope of their real estate license.

The soil surveys that comprise your AOI were mapped at 1:20,000.		Warning: Soil Map may not be valid at this scale.	
Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.		Please rely on the bar scale on each map sheet for map measurements.	
Source of Map: Natural Resources Conservation Service Web Soil Survey URL: https://websoilsurvey.sc.egov.usda.gov/ Coordinate System: Web Mercator (EPSG:3857)		Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.	
This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.		Soil Survey Area: Jessamine and Woodford Counties, Kentucky Survey Area Data: Version 20, Aug 30, 2024

Description

Farmland classification identifies map units as prime farmland, farmland of statewide importance, farmland of local importance, or unique farmland. It identifies the location and extent of the soils that are best suited to food, feed, fiber, forage, and oilseed crops. NRCS policy and procedures on prime and unique farmlands are published in the "Federal Register," Vol. 43, No. 21, January 31, 1978.

DISCLOSURE OF INFORMATION AND ACKNOWLEDGMENT OF LEAD-BASED PAINT AND/OR HAZARDS

TODAY’S DATE: 08/01/2025 CONTRACT DATE: CONTRACT #

PROPERTY ADDRESS: 330 McCracken Pike and 131-133 Camden Avenue, Versailles

Lead Warning Statement

Every purchaser of any interest in residential real property on which a residential dwelling was built prior to 1978 is notified that such property may present exposure to lead from lead-based paint that may place young children at risk of developing lead poisoning. Lead poisoning in young children may produce permanent neurological damage, including learning disabilities, reduced intelligence quotient, behavioral problems, and impaired memory. Lead poisoning also poses a particular risk to pregnant women. The seller of any interest in residential real property is required to provide the buyer with any information on lead-based paint hazards from risk assessments or inspections in the seller’s possession and notify the buyer of any known lead-based paint hazards. A risk assessment or inspection for possible lead-based paint hazards is recommended prior to purchase.
