GENERALS

TEMPLATE CUTTING

Our full-sized piecing template patterns have 2 lines — a solid cutting line and a dashed line showing the $\frac{1}{4}$ " seam allowance.

1. To make a template from a pattern, use a permanent fine-point pen to carefully trace pattern onto template plastic, making sure to transfer all alignment and grain line markings. Cut out template along inner edge of drawn line. Check template against original pattern for accuracy.
2. To use a template, place template on wrong side of fabric (unless otherwise indicated in project instructions), aligning grain line on template with straight grain of fabric. Use a sharp fabric-marking pencil to draw around template. Transfer all alignment marking to fabric. Cut out fabric piece using scissors or rotary cutting equipment.
