One of my twelve-year-old grandsons recently spent the weekend with us. He is my city boy who wants to be a country boy. He loves roaming and exploring, but he is also very sensitive to others' needs and wishes, and he knows his mom, my daughter, is not a country person. She doesn't like the bugs, animals, the dirt, the uncertainty of the dark, all things I love except maybe the ticks and the biting bugs!

It was one of those cold weekends, the ones you get near the end of winter that hold the promise of spring but are just a reminder that winter is not done yet. It is getting dark later and later and light sooner in the morning, giving us some beautiful sunsets and sunrises. That night after we cleaned up the dinner dishes I decided we were going to watch Secondhand Lions.

I am not a big movie or tv person. I believe in living my life, not watching someone else live a made-up one. Maybe it was because Robert Duvall had just died, or maybe I just remember how much I loved that movie, or that it was a really cold night and I wasn't up to playing Uno one more time. Maybe it was because he was reading a book about a young boy who survived 9/11 but yet lost his parents and I just couldn't listen to the sadness in his voice as he read me the story. He reads out loud to me and I love that he talks to me about things like this and says it is okay to cry, Oma.

Of course, the first thing he says is this movie was made in 2003 and he was sure it would be boring, but about 5 minutes in he looked at me and said this is really good. Just as the movie ended around 9:30, my youngest texted me and said, Mom, have you seen the moon?

So the next order of business is getting into warm jackets, hats and mittens, and heading outside to see the moon waxing crescent at about 25% in the western sky just as it was starting to set on this single digit night. I wish I had the words to describe it or had captured its beauty but some things you just have to see. As we turned around to walk back to the house we looked up and saw the beauty of the other stars and listened as the owls called back and forth to each in the quiet of the cold winter night.

As we are walking back, I am thinking to myself, this is what grandparents are here for, to give our grandchildren a different perspective of the world. We aren't so caught up in the day to day raising them and taking care of them. We get to enjoy them and maybe leave them with memories that they tell their own children. Memories of walking outside on cold nights with the stars and moon shining so brightly that you don't need a flashlight, of old movies that just made you feel good, and of an Oma who was just crazy enough.

Throughout this catalog, the application line of the part number describes which model of GM Truck that particular part will fit. The models this catalog covers are 1988-98 2WD, 4WD, 1/2 ton and 3/4 ton trucks. Because not everyone can identify their truck by these model descriptions, here is an example of what each letter and number that appears on the description line stands for:

Part Number Examples

If You Can't Find the Part You Need in this Catalog, Here's What You Should Do:

- Check local SALVAGE YARDS. Even if they do not have a car like yours on hand, most salvage yards have access to a communication network which connects them to other salvage yards in your region of the country. Don't hesitate to ask them if you may use it.
- Check local BODY SHOPS and GARAGES for parts accumulations they may have built up over the years. You might get lucky!
- Check local WELDING and MACHINE SHOPS to see if they might be able to MAKE the part you need.

Transfer Case Identification

All Transfer Cases have an assembly tag attached to their case. The tag may be a bolted, riveted or screwed on metal tag, or a stick-on paper tag. The Transfer Case must be identified by the assembly number listed on the tag. If your tag number does not appear on the line, it will not fit your truck. See illustration.

LMC TRUCK is in no way affiliated with the General Motors Corporation nor do we intend to imply that. The names General Motors, GMC and Chevrolet are used for reference only.

Applications listed in this catalog are based on original factory information. However, variances will occur due to non-documented substitutions, and changes made during the vehicle's production.

1988-98 Truck History

1988 Totally redesigned trucks were lower, longer, more aerodynamic and were engineered for driving comfort while providing all the latest convenience features. The exterior was 3-1/2" narrower but featured more leg and shoulder room. Larger, flush mounted glass provided a 33% increase in viewing area than previous pickups. Stepside models were only offered on 1/2 ton standard cab shortbed configurations with rear fenders made of fiberglass panels with functional steps on the front and rear of the fender. Extended cab was optional for the first time on Fleetside models. Bed was a one-piece welded unit. Three trim levels were offered for Chevrolet: Cheyenne, Scottsdale and Silverado. GMC trim levels were base, SLX and SLE. 4WD trucks had independent front suspension with torsion bar springs. Insta-Trac 4WD system shift-on-the-fly allowed shifting from 2WD to 4WD high at any speed. Standard engine was a 4.3L V6. All gas engines featured throttle body fuel injection.

1989 Fleetside Sport appearance package included body color grille and bumpers, chrome plated wheels, fog lights and sport graphics. GMC Sport model was named the Sierra GT. Z71 off-road package featured engine, front differential and transmission skid plates with Bilstein shocks.

1990 454SS 2WD 1/2 ton standard cab, shortbed debuted in Onyx Black with Silverado trim. This limited edition truck was equipped with 230 horsepower and 385 lb.-ft of torque, Turbo 400 transmission, performance handling package and a 3.73 rear axle ratio. Work Truck (W/T) also introduced as a low option regular cab longbed in standard Cheyenne trim with a new grille and black bumpers. 2WD and 4WD versions were offered.

1991 7.4L engine was revised to increase its reliability and fuel economy. The 4L80E, a new 4-speed automatic electronic overdrive transmission, was available on heavy-duty models. Other options included a tachometer, high back reclining bucket seats and a bedliner.

1992 Stepside models were available with extended cabs. New exterior colors for the 454SS model were red and white. 4-speed manual transmission was dropped. 6.5L Diesel engine available with turbocharger.

1993 Sportside Sport included body color grille, side mirrors, front and rear bumpers, and cast aluminum wheels. Scottsdale trim level dropped. All models featured an anti-chip coating applied to the leading edges of the hood, roof and A-pillars. 4.3L engine received a new balance shaft and revised cylinder heads with improved flow. Hydra-Matic 4L60E 4-speed electronic overdrive automatic transmission available for trucks under 8,500 lb. GVW. Last year for the 454SS.

1994 Chevy and GMC grilles received updates. Guard beams added to both front doors for safety. Third brake light added to cargo light on roof. Air conditioning system switched to R134A. Base model GMC renamed SL and upgraded SLT trim was added. 6.2L Diesel engine dropped.

1995 4-wheel ABS and driver side airbag were standard. Interior was restyled and the audio system was improved. Remote keyless entry was optional.

1996 All engines were reengineered; Vortec designation was extended to all gas engines. 4.3L, 5.0L and 5.7L engines were equipped with central sequential fuel injection. 7.4L featured multi-point fuel injection. High-flow cylinder heads, higher compression ratio, roller valve lifters and new camshafts contributed to 30% more horsepower and 10% more torque improvement. Diesel engine only available with turbocharger. OBDII debuted. NP1 electric shift transfer case was available, eliminating the floor-mounted shifter. Daytime running lamps standard. Third door on passenger side was optional.

1997 Passenger side airbag standard on all models under 8,600 lb. GVW. Electronic speed sensitive power steering system introduced. 4L60E and 4L80E transmissions were tweaked for smoother operation and greater efficiency.

1998 OnStar system became a dealer-installed option. Passlock theft-deterrent system added.

Steel Body Panels and What to Expect

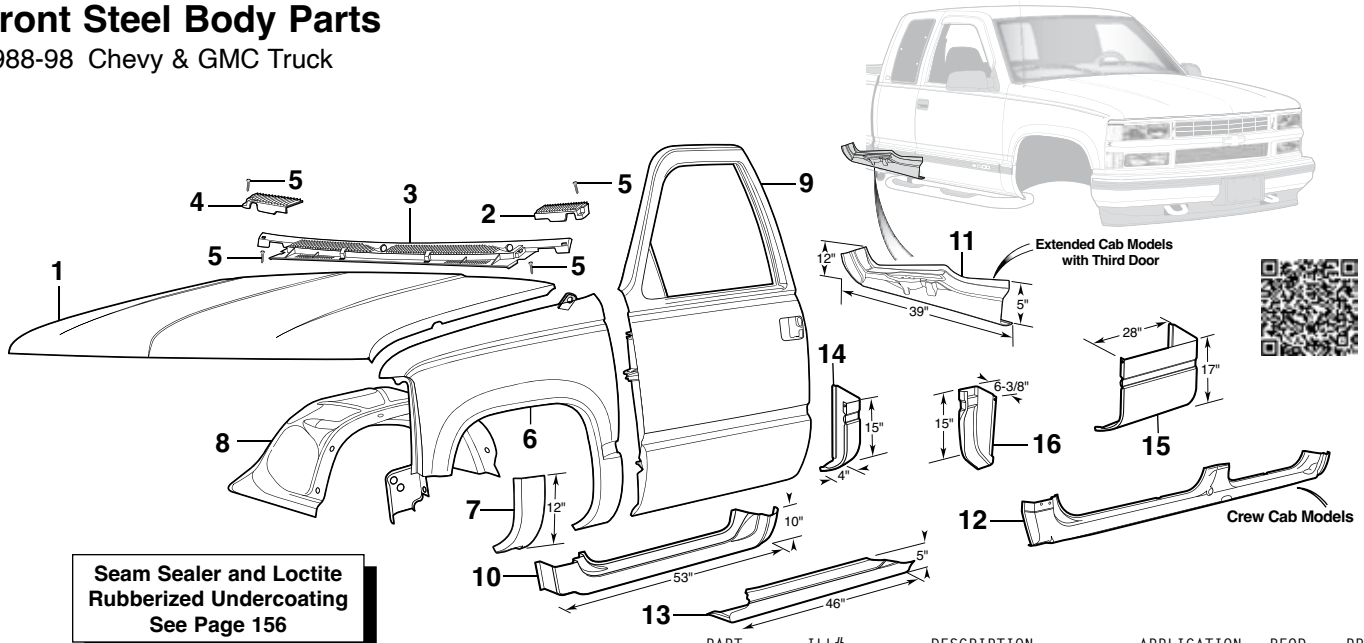

All sheet metal is inspected before it is shipped and careful steps are taken to package parts so there is no damage during shipping. Due to the nature of the product, sheet metal is easily damaged and scratches, dents, dings and other imperfections are normal and not considered damaged. These kinds of imperfections should be expected and can be easily fixed during installation and the paint preparation, sanding and priming stages of your restoration. It is recommended you inspect all sheet metal that is delivered before the delivery driver leaves. Test fitting of all panels before installation is recommended and the use of alignment shims and other adjustments during the install may be required.

* Or ** after the sell price means your order will incur an Oversize Part Charge for each oversized part. * Means extra charge will be $20. ** Means extra charge will be $50. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.

Cowl Induction Steel Hoods ... Give Your Truck a High Performance Look

Cowl Induction Steel Hood helps cool the engine for increased airflow and increased performance.

-T after part number means that part must be shipped Truck Freight with an additional charge for delivery in the 48 contiguous United States. Orders outside 48 states will be quoted. Additional delivery time required. See Delivery Information for rate chart.

The outside cold fresh air carries a denser air/fuel mixture to an engine's combustion chambers than the warm underhood air. Hoods are made from primed high-quality steel with full inner frame that reuses original factory latch and hinges for an easy bolt-on application and must be painted.

POR-15 Patch Filler & Seam Sealer is quite literally POR-15 Rust Preventive Coating in a tube, and it dries as hard as a rock, remains flexible, and once dry is totally impervious to fuels and solvents. This rust hole filler is so tough it may actually add strength to weakened metal, and it won't absorb moisture and swell like conventional body fillers. This sandable seam sealer permanently patches holes in steel, wood or some plastics, seals seams, and even fixes holes in fuel tanks. 4 oz. Tube.

PART	DESCRIPTION	PRICE
37-8406	PATCH FILLER-SEAM SEALER	$22.47

Metal-Prep provides adhesion for POR-15 on any metal surface. Gently etches metal, neutralizes rust and creates an ideal anchor for coatings such as POR-15, while leaving a zinc phosphate finish to ensure chemical bonding of paint and steel. Metal-Prep must be used on galvanized metal, aluminum, stainless steel and smooth, polished or new metal surfaces prior to applying POR-15. Metal-Prep is water-based so it is not caustic, corrosive, toxic or flammable.

PART	DESCRIPTION		PRICE
37-8415	METAL-PREP	1 QUART	$22.14
37-8416	METAL-PREP	1 GALLON	$44.74

POR-15 Self Etch Primer is a quick drying and easy-to-apply coating which enables a restorer to quickly topcoat POR-15 Rust Preventive Coating and other basecoats. You can even topcoat POR-15 that's been in place for months or years. This Self Etch Primer is NOT a high-build primer, it can be sprayed on almost any painted surface and can be top coated in 15 - 30 minutes. It bonds incredibly well to POR-15 Rust Preventive Coating, and all topcoats bond incredibly well to POR-15 Self Etch Primer. It can be sanded lightly, and, if desired, multiple coats may be applied.

3-in-1 Truck Ties

Tie Down Anchors - See Page 21

Tested to -20°F and 165°F, these 3-in-1 Truck Ties are made in the USA from durable nylon plastic and are designed to fit into the stake pockets of your truck in three different ways: by installing with the ring side facing the truck bed so multiple cargo straps can be used; with the cleat side facing the truck bed to keep tension in the rope each time it is looped around the tie; or by covering the load with a tarp over the stake pockets and inserting the truck ties into the stake pockets over the tarp (rated for highway speeds).

Ties can be installed and removed with no drilling or modifications necessary.

Flexy-Flares™ ... To Cover Those Wide Tires

38-3208

Flexy-Flares™ provide protection from mud, dirt, gravel and salt and are a necessity in many states where wide tires must be covered by a fender. Constructed from EDPM synthetic rubber, they won't crack, peel or droop in extreme temperatures. These heavy-duty flares use a wire insert on outer edge for extra strength and added rigidity, and the built-in curvature allows the flare to fit the fenderwell without wrinkles or buckling. Flexy-Flares™ extend your fenders 3" and come with hardware packs for easy installation. **Set of 4**

Steering Controls - 4 Wheel Drive

1988-98 Chevy & GMC Truck

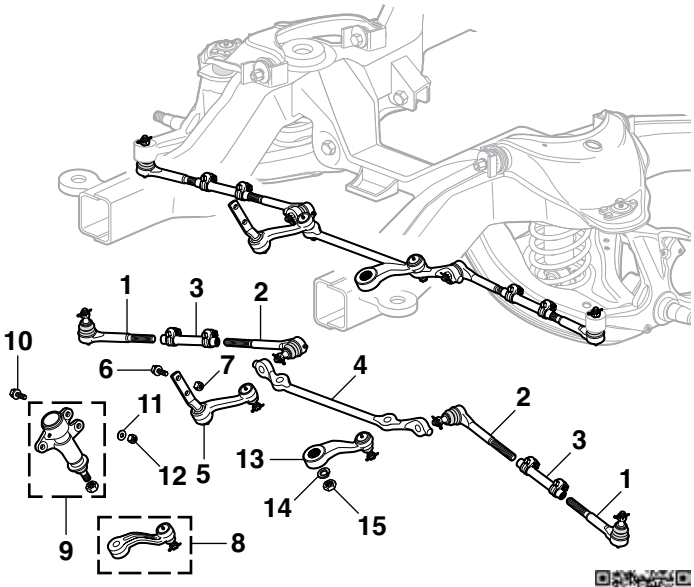

A Steering Stabilizer Kit is basically a horizontal shock absorber that helps to stabilize the steering system. The kit not only helps to stabilize the steering, but can also help in the prevention of "Bump Steer", when the steering wheel jerks suddenly as a result of hitting a pothole or object in your path. These kits will also help to reduce normal wear on vital suspension pieces, and make tires last longer. This kit is especially helpful for trucks whose original equipment tires have been replaced by larger or wider ones.

Drop Shackles and Spring Hangers

37-8528

37-8527

The Drop Shackle Set lowers the rear of your truck 1" or 2". This is the simplest way to lower the rear and is an easy way to make your truck look more level.

The Drop Spring Hanger Set replaces the original front hangers and drops the rear of your truck an additional 2". Combined with the Drop Shackle Set, you can drop the truck a total of 3" to 4". If you are dropping the rear 4" or more then you need shorter rear drop shocks listed below.

PART	DESCRIPTION	APPLICATION	REQD	PRICE

37-8547	CARRIER BEARNG RELOCATOR EXT CAB	2WD 1/2T 88-98	(1)	$39.95

The Axle Flip Kit repositions the rear leaf spring below the axle for a 6" drop. You will also need the Frame C-Notch Kit for suspension travel. The C-Notch Kit requires cutting and drilling your frame. If you have an extended cab you will also need the Carrier Bearing Relocator. If you are dropping the rear 4" or more then you need shorter rear drop shocks.

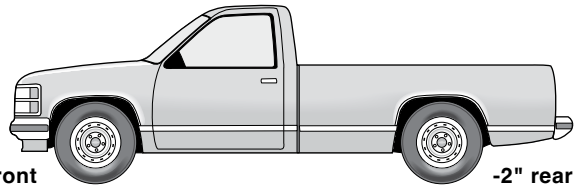

3 Ways to Lower Your Truck

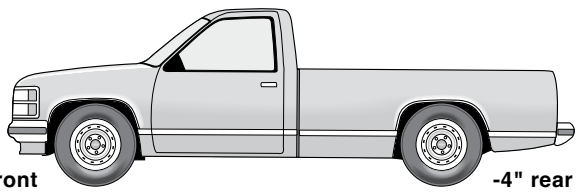

Factory Truck Stance

Drop is based on the original factory ride height as measured from the top of the wheel arch to the ground. Original ride height is approximately 2" higher in the rear. The stance (difference in height between the front and rear) is not affected when you lower the front and rear an equal amount. To make your truck look level you need to lower the rear approximately 2" more than the front.

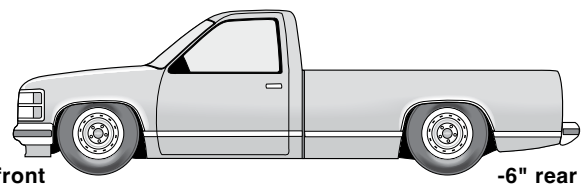

-2" front **-2" rear**

LOWER - Lower your truck with shorter Drop Coil Springs in the front and Spring Shackles in the rear. This is the most economical way to lower your truck.

-2" front **-4" rear**

DROP - Drop the front of your truck with Drop Spindles and the rear with Spring Hangers and Shackles. Drop Spindles are the best way to lower your truck because they do not affect other suspension components. Original front suspension geometry and ride quality are maintained.

-4" front **-6" rear**

SLAM - Combine Drop Spindles and Springs in the front with an Axle Flip Kit and C-Notch in the rear to take your truck as low as possible. We have the parts you need to slam your truck for a great look and a smooth ride. Take your truck to the maximum possible "lowness".

Wheel Bearing Grease Packer

Wheel Bearing Grease Packer quickly flushes out old grease and repacks the bearing with less the mess. The Wheel Bearing Grease Packer works on bearings up to 3 1/2" outer diameter. The grease stays in the tool cavity, not on your hands. To pack a bearing, simply place the bearing on the piston, press down on the cap until the old grease is forced out and the new grease shows on top of the bearing.

Front Differential Cable Lock Kit ... Cures Slow to No-engagement Blues !

Not Just an Accessory, It's a Necessity

Works like hubs with full control from inside the cab without stopping, in any temperature. Will not disengage when ignition is turned off or if differential is submerged in mud, water or snow. Two-wheel drive low range benefits from bind-free steering AND high rear axle torque. This feature is not available with factory systems and is beneficial when maneuvering trailers. Reduces front differential wear and right axle breakage.

The factory system uses a TLA (Thermal Linear Actuator) to engage the front axle, which is a heat-activated plunger that is prone to failure and takes longer to engage when cold outside. Differential Lock Kit replaces the TLA with a cable-operated system, guaranteeing four-wheel drive engagement every time. A one-inch pull of the Differential Lock Kit cable ensures having four-wheel drive when needed.

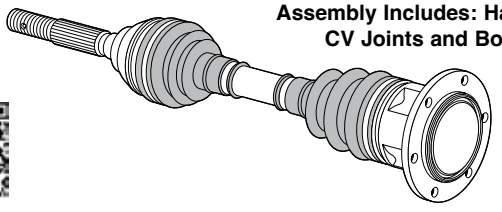

Differential Lock Kit is compatible with manually (lever) or electrically (push button) engaged transfer cases. Easily installed in one to two hours with basic hand tools. No internal axle or differential work required.

PART	DESCRIPTION	APPLICATION	REQD	PRICE
36-1585	DIFFERENTIAL LOCK KIT "A" 6 LUG	4WD 88-98	(1)	$217.95

Note: "A" Does not fit 1998 models equipped with Auto-Trac transfer case. Rear of transfer case is stamped #NP246. These models are equipped with a large electric motor instead of a TLA.

4WD Transfer Case Components

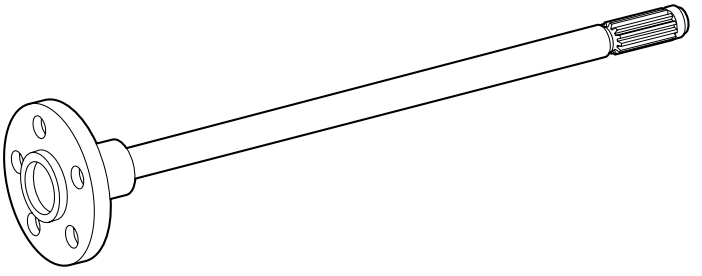

Transfer case chains can stretch due to heavy use or high mileage and cause damage to the transfer case housing increasing the chance of expensive repairs.

Transfer case shift fork pads allow smooth shifting between 2WD and 4WD modes by engaging the shift collars inside the transfer case. Pad failure can prevent shifting between drive modes, possibly damaging the gears inside the transfer case.

Oil Pump Priming Tool

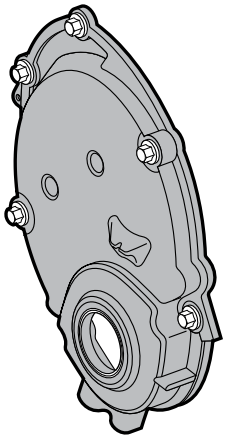

Before starting a new or rebuilt motor for the first time, it's critical to prime the lubricating system to prevent premature wear. Failure to pressurize the oil could result in a dry start that can cause camshaft, bearing and/or piston ring failure. An Oil Pump Priming Tool makes this process easy — just remove the distributor, insert the priming tool and turn it clockwise with a 3/8" drill. The tool has a machined aluminum collar that simulates the distributor and helps to eliminate damaging side loading of the oil pump drive while priming.

Throttle Body Spacer

Improve performance and fuel economy … The Throttle Body Spacer causes the fuel to travel further, which improves fuel dispersion making it easier for the fuel to ignite and burn thoroughly. Receive increased throttle response, a 10-15% improvement in torque and gas mileage increase of up to 8%. Easily installs between intake manifold and throttle body injection unit. Will not affect computer function.

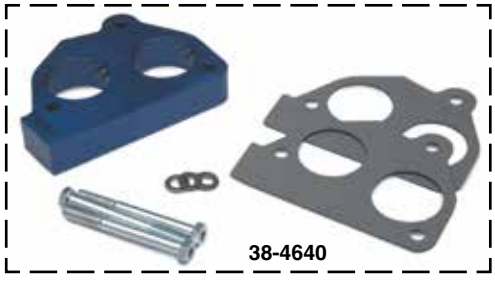

Fuel Line Extension Set lengthens the fuel lines and is recommended for easier installation of throttle body spacers.

Dual Electric Cooling Fan Assembly provides increased horsepower and improved MPG. Electric fans provide increased cooling at idle when needed most and eliminate the draw of a mechanical engine-driven fan. Increased airflow across A/C condenser gives cooler, more consistent A/C temperatures at low engine speeds.

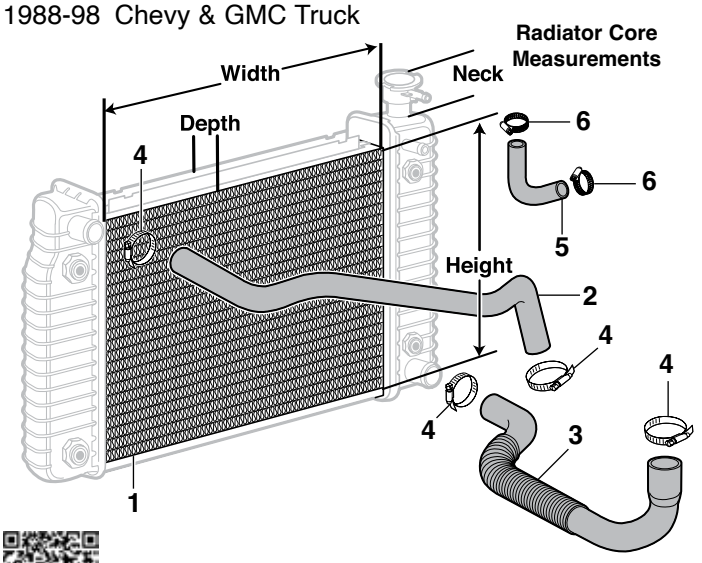

Dual Electric Fan Assemblies have a quiet S-blade design and include a wiring harness, relay, adjustable fan temperature switch, mounting brackets and installation instructions.

A/C Cooling Fan Harness activates the electric cooling fan when the A/C compressor clutch is engaged. Kit includes heavy-gauge wire harness, relay, 30 amp fuse, electrical connections and installation instructions.

Air Conditioning Components

1988-98 Chevy & GMC Truck

Tech Tip

A seized A/C compressor renders your vehicle inoperable. Alleviate untimely and expensive air conditioning repair bills with an A/C Bypass Pulley. Remove A/C compressor, install A/C Bypass Pulley and original size belt, and then you are back on the road.

A/C Hose Assemblies may vary in appearance from illustration depending on your truck's model.

1990 Air Conditioning Note: In 1990 there were two different A/C configurations.

1st Design: Lower A/C condenser tube has a female fitting and the orifice tube is located near the evaporator.
2nd Design: Lower A/C condenser tube has the orifice tube and a male fitting.

Superwhite Bulb Set Produces 30% More Light

Superwhite headlight bulbs produce 30% more light while retaining the street legal wattage. Superwhite bulbs use a proprietary mixture of premium gases that includes Xenon, which cools the light filament, improving the efficiency and light output of the bulb, unlike standard halogen bulbs which use less efficient argon gas.

Superwhite bulbs operate in the Kelvin color temperature range of 4000-4200K, producing a brighter, white light. Traditional halogen bulbs operate at 2600-3000K, emitting a more yellowish appearance. Sold in sets of two. Call or go online and order yours today!

What You Need to Know When Shipping Problems Occur

Please open your package(s) as soon as possible and make certain that everything is accounted for and nothing was damaged in shipment. Damaged shipments are the responsibility of the carrier and must be reported to the carrier within 15 days of receipt.

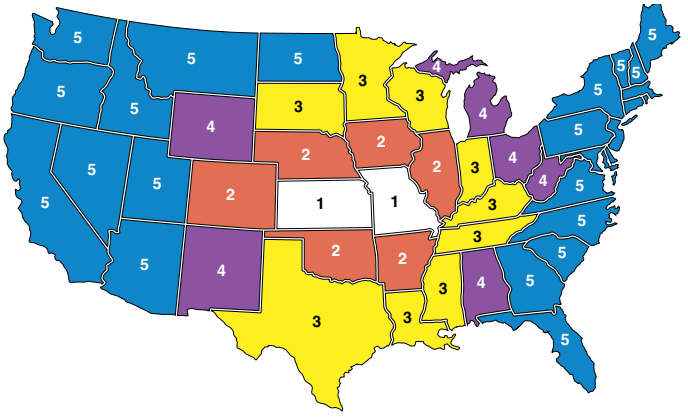

If the package looks damaged when it arrives, open it with the delivery person present, so that they can make an immediate report of damages and discrepancies. If the damage is not obvious at the time of delivery, or if the package was left for you by the shipping company, contact their customer service as soon as possible to make your claim.

On Truck Freight shipments, it is your responsibility to check your order and have the driver note any damage on the freight bill before you sign for your item(s).

Please keep all packing, packaging and contents until your claim has been settled with the shipping company.
