

2027 PLF Call for Proposals: Suggested Topics

1. AI and Technology

- AI integration with EMR systems
- AI impact on billing and coding workflows
- Practical lessons learned from AI adoption (successes and failures)
- Ensuring sessions provide tangible, operational takeaways
- AI's role in various practice models and sizes

2. Leading the Modern Radiology Workforce

- The changing partnership model
- Recruiting in a new market
- Building culture in a diverse workforce
- Retention and loyalty in a competitive environment
- Managing a workforce with multiple employment structures

3. Practice Operations & Workforce

- 1099 contractor roles and evolving employment models
- Physician performance measurement
- Compliance challenges in modern practice
- Practice culture and leadership accountability
- Managing workforce expectations without framing around “burnout”
- Governance structures in radiology practices

4. Academic–Private Practice Intersection

- Residency and fellowship programs within private practice settings
- Collaboration between academic and private practice models
- Overlapping operational and financial challenges
- Insights from hospital administrators on radiology performance and value
- Setting up private practice residencies/fellowships

5. Policy, Legislation & Advocacy

- Impact of recent elections on radiology and medicine
- New or pending federal legislation affecting practices
- Regulatory changes and compliance implications
- State-level lobbying perspectives
- The evolving policy environment for private and academic practices
- Potential inclusion of government relations representatives or policymakers

6. Leadership & Organizational Strategy

- Leading through uncertainty and legislative change
- Financial sustainability and reimbursement pressures
- Culture-building in complex organizations
- Practical leadership lessons from experienced administrators

7. Consolidation/Mergers

- Impact on smaller practices
- Experience of those who stay independent
