*Solera: To replace rum lost by Angel's share with new and younger rums (same process followed by Sherry)

*Navy Strength: The British Royal Navy historically received rations of a 114.3 proof and higher rum to test gunpowder. This style of rum is typically a blend of aged rums, that have higher proof and bold flavor

*Rhum Agricole: Rhum Agricole is produced from freshly pressed cane juice instead of molasses. (If molasses is used, the spirit is called rhum industrielle or rhum grande arôme).

*AOC: Martinique has an Appellation d'origine contrôlée (AOC) status for its Rhum Agricole.
