BARRELL BOURBON

BATCH 027

Batch 027 started with 6-year-old fruit forward barrels from Tennessee and 5-year-old spice forward barrels from Indiana. After these were blended together, 13 and 15-year-old barrels with more wood tannin and depth were layered in and a select number of 9-year-old barrels with a higher rye content were blended in for spice and assertiveness. Finally, 5 and 8-year-old wheated bourbon barrels were added to soften the batch, brighten the front palate, and solidify a cohesiveness to an otherwise extremely complex flavor profile. At times bright and juicy, at others, brooding and oxidized, but while there are many flavors to be found, cherry stands above them all.
