Assembly Instructions

Raised Shelves to Wood Top

Side mounting raised shelf to wood top.

Hardware required: 4 truss bolts 3/4" long, 2 tap bolts 3/4" long, 6 hex nuts, 4 lag bolts, 12 washers. When mounting shelf ends, be sure the side of the shelf end with the longest bend faces rear of bench. Line up right shelf end with bottom and back edges flush with bottom and back edges of bench top. Mark holes on side of work surface for drilling. Repeat for other side. Drill holes 1 1/4" deep on both sides of work surface. Drill 9/32" holes for maple tops, 1/4" holes for all other wood tops. Using lag bolts and washers, attach ends to work surface. Place raised shelf top over ends with holes to rear. Secure top to ends using hardware as shown. Tighten securely using hex nuts and washers provided.

Top mounted raised shelf to wood top.

Hardware required: 4 truss bolts 3/4" long, 2 tap bolts 3/4" long, 6 hex nuts, 4 lag bolts, 12 washers. When mounting shelf ends, be sure the side of shelf end with longest bend faces rear of bench. Line up right shelf end with side and back edges flush with side and rear edges of bench top. Mark holes on top of work surface for drilling. Repeat for other side. Drill holes 1" deep for 1 1/4" thick tops, 1 1/4" deep for 1 3/4" thick tops. Drill 9/32" holes for maple tops, 1/4" holes for all other wood tops. Using lag bolts and washers, attach shelf ends to work surface. Attach raised shelf top as described above.

Assembly Instructions

Raised Shelves to Steel Top

Mounting raised shelf to steel top.

Hardware required: 8 truss bolts 3/4" long, 2 tap bolts 3/4" long, 10 hex nuts, 12 washers. When mounting raised shelf ends, be sure the side of the raised shelf end with longest bend faces rear of bench. Line up bottom holes in shelf end with holes on side of steel top as shown below. Fasten shelf end with truss bolts, nuts, and washers and tighten securely. Repeat procedure for the other side. Place raised shelf top over ends making sure that back bend of top with holes in it faces rear of bench. Secure top to ends as shown left using hardware provided. Tighten all hardware securely using hex nuts and washers.
