

Summer Math Multiplication Practice- Rising 4th Graders

In an effort to better prepare rising fourth graders for math next year, please utilize the resources provided to ensure your child knows his/her multiplication facts (1-10) for fourth grade. Students will be given mixed multiplication drills shortly after the school year begins.

It is our hope that this would be a fun and productive time of review! Many of the resources provided are online computer games (see below), although normal flashcards (whether online—see below--or concrete) are also an option. There are also instructions provided for “Multiplication War” played as a tangible card game. These resources are great for all learning styles, ranging from technological, visual, solitary, logical, kinesthetic, and social learners.

Multiplication facts are an essential skill for many fourth grade math objectives including, but not limited to: multi-digit multiplication, long division, fractions, and more! It is imperative students begin fourth grade with a solid multiplication facts foundation, which will help prepare them for what is to come.

Thank you in advance for helping prepare your child for a successful year in math!

Mrs. Kimberly Staples

4th Grade Teacher

Sugar Hill Christian Academy
