KEY BENEFITS

Designed for zinc-responsive crops, MicroFlo provides a zinc-focused micronutrient package to enhance early vigor and emergence, while improving seed flow and handling.

Built for corn and other zinc-responsive crops, SylGro™ MicroFlo combines a high-performance graphite seed lubricant with a zinc-focused micronutrient package. It enhances seed handling and flowability to maintain consistent planting, while placing key nutrients at the seed to support early vigor, rapid root development, and uniform crop emergence.

SEED TREATMENT

Application Rates:
Apply as directed to seeds in planter box, seed box, or seed tender.

FIELD TIPS

Ensure even coverage on seed for optimal flow and micronutrient distribution.

COMPATIBILITY

Compatible with most seed treatment systems and planter graphite applications.
