A collection of various tools and equipment hanging on a white slat wall. The items include a green garden hose, a green leaf blower, a black rake, a black shovel, a black wheelbarrow, a black ladder, and a black bag. The tools are organized in a neat, grid-like fashion, with each item hanging from a specific hook or bracket. The background is a plain white wall, and the floor is a light-colored tile.

QUALITY + DURABILITY

The material used to make the panels and shelves is furniture grade composite board which gives it the strength needed for quality construction.

1

This decorative laminate layer is available in a variety of colors.

2

High density composite panels are CARB 2 compliant and meet LEED green building standards. Our substrates are made from wood sourced from certified, recycled, recovered and/or controlled sources.

3

Our panels are custom-cut using 3/4" thick TFL, which consists of laminate, fused to a high-density composite panel (heat and pressure fuses the decorative layers to the core, actually becoming part of the panel itself).
