QUALITY + DURABILITY

The materials used to make the core in each panel and shelf are chosen because they are premium industrial grade composite boards – the same board used in furniture and kitchen cabinets.

1

This decorative laminate layer is available in a variety of colors.

2

High density composite panels are CARB 2 compliant and meet LEED green building standards. Our substrates are made from wood sourced from certified, recycled, recovered and/or controlled sources.

3

Our panels are custom-cut using 3/4" thick TFL, which consists of laminate, fused to a high-density composite panel (heat and pressure fuses the decorative layers to the core, actually becoming part of the panel itself).

**Although we make every effort to ensure color accuracy, your final product may not be an exact match to the image displayed.*
