Viggo Boats Announce Appointment of Vortec Marine as Exclusive Dealer, UK & Ireland

Öregrund, Sweden – August, 2025. Viggo Boats, pioneers of premium hybrid aluminium vessels, are proud to announce the appointment of Vortec Marine as their exclusive UK & Ireland dealer. With a shared commitment to performance, innovation, and future-ready marine solutions, this partnership marks an exciting new chapter for both companies.

“Vortec Marine’s technical expertise, established reputation, and deep understanding of the UK marine market make them the ideal partner for Viggo Boats,” says Erik Wickgren, CEO of Öregrund Marine Service AB, manufacturer of Viggo Boats. “As interest in sustainable, zero-emission boating accelerates in the UK, we are confident Vortec will represent our brand with the passion and precision it deserves.”

The partnership comes at a pivotal moment for the British marine sector. As commercial operators, harbours, and private owners look for greener alternatives, Viggo Boats, based in Öregrund, Sweden, stand out, with high-performance, hand-built aluminium boats renowned for their ruggedness, speed, and innovative design. Their range caters to diverse maritime needs, from high-speed leisure to energy-efficient cruising.

The Viggo C8 and its refined version, the C8.1, are compact yet powerful vessels designed for swift and safe year-round travel. With lengths of 8.2 meters and top speeds ranging from 45 to 65 knots, they are ideal for coastal adventures. The C8.1 introduces enhanced ergonomics, improved hull dynamics, and a redesigned helm station for modern navigation.

The Viggo X8 is a versatile open boat suitable for family outings and social gatherings, offering exceptional driving characteristics and fuel efficiency. For those seeking robust offshore capabilities, the Viggo C10 Offshore is compelling. At 10.95 meters in length, it boasts top speeds between 50 and 65 knots, accommodating up to ten passengers. Its design features a deep-V hull and advanced trim systems, ensuring stability in challenging sea conditions.

The latest addition, the Viggo C11 Cruiser, emphasises sustainability without compromising performance. Built for efficient cruising at lower speeds, it comes standard with an all-electric drivetrain and offers modular options for future propulsion technologies.

Each Viggo model reflects the company's commitment to quality, safety, and innovation, making them a strong choice for boating enthusiasts seeking reliability and performance.

With bases in Swanwick and Gosport Vortec Marine has built its reputation as a leading distributor and service provider for high-performance and commercial vessels. Their experienced team delivers technical advice, sales support, and aftercare with a level of precision that matches Viggo Boats' ethos of quality and durability.

“Viggo boats are some of the most exciting developments we’ve seen in sustainable marine engineering,” says Ross Collingwood Founder and Managing Director of Vortec Marine. “They provide a real solution for professionals and private owners who need serious range, functionality, and year-round reliability - without compromising on sustainability. They are built for those who appreciate true seamanship. We’re proud to bring these Nordic-built powerhouse to UK waters.”

Vortec Marine will act as the exclusive point of contact for all Viggo Boat enquiries in the UK & Ireland, offering test drives, technical demonstrations, and full sales and aftercare support for both professional and private clients.

“This is the beginning of a serious movement toward sustainable, long-range electric boating in the UK”, concludes Erik Wickgren. “And with Vortec Marine leading the way, we’re in very capable hands.”
