BROWNELL BOAT STANDS & EQUIPMENT LAUNCHES NEW WORKSHOP SERVICE STATION FOR ENGINE MECHANICS

Dartmouth, Mass. – Brownell Boat Stands & Equipment, manufacturer of the highest-quality, safest boat storage equipment on the market, now in its 70th year of operation, announced today the introduction of the versatile and innovative Workshop Service Station.

The modular Brownell Workshop Service Station is comprised of a pedestal and rotating t-mount and can be fitted with either a lower unit and outdrive or outboard fixture. It can be mounted either as a floor-mounted pedestal or as a bench-top unit and with 360-degree rotation can fit almost any shop space. Designed for easy balancing and maneuvering of lower units, outdrives and small outboards, the Workshop Service Station is a versatile tool. The pedestal base can be rotated 360-degrees, while the t-mount can be fixed at 45-degree increments making it easy to manipulate bulky components. Adjustable handles allow for optimal leverage when locking and unlocking rotating sections and a positive locking pin gives added peace of mind, preventing accidental rotation of larger components or top-heavy outboards. The outboard fixture can accommodate outboards up to 200 pounds, while the lower unit and outdrive fixture has coarse and fine adjustment forks that can be locked in place from 6 to 15-inches wide. As an optional extra, Brownell is also offering a tool tray that will work with the pedestal mount, capable of holding tools, parts such as anodes, propellers, water pump components, consumables, and anything else the technician needs to complete the job.

“We’ve put a great deal of thought into the development of the Service Station, designing it to make servicing outboards and outdrives easy,” said Alex Kavanaugh, president, Brownell Boat Stands. “Like all of our products, our customers can count on the durability of the Service Station, made in the U.S. using U.S. steel. We’ve never had a failure in 70 years, and you can be sure that this will be a useful addition to your shop for as long as you or your children are in the business.”
