

**RITEAIRE MARINE™ LAUNCHES DEHUMIDIFICATION SYSTEM  
FOR SMALLER BOATS,  
APPOINTS ICE MARINE AS A NEW DEALER/INSTALLER  
IN THE PALM BEACHES/STUART AREA**

**ST. PETERSBURG, FL – November 17, 2025** – Leading yacht dehumidification systems provider [RiteAire Marine](#)™ is proud to announce it launched the new RAM 30 model dehumidifier unit at the recent Fort Lauderdale International Boat Show. Installed as part of the patented RiteAire Marine Whole Vessel Dehumidification System, RAM 30 is designed to control interior humidity on boats from 40 to 50 feet. With this new unit, RiteAire Marine now offers dehumidification solutions for vessels from 40 to 125-plus feet.

The new RAM 30 unit has a depth of less than 6".

Compact yet highly efficient, the new RAM 30 removes nearly 5 gallons of water from a boat's interior per day when ducted and installed as part of the RiteAire Marine Whole Vessel Dehumidification System. Measuring just 14" W x 30" H x 5.75" D, it can be installed out of view in tighter spaces than RiteAire Marine's larger RAM 75 and RAM 100 units, which are used in bigger yachts.

"With the enormous popularity of outboard-powered center console and cruising boats from 40 to 50 feet, we are proud to offer our patented, whole-vessel solution for reducing humidity in this rapidly growing segment," said RiteAire Marine Co-Owner Ted Reese.

#### **New Dealer/Installer**

As part of RiteAire Marine's continuing growth and commitment to customer service, the company also appointed [Ice Marine](#) of North Palm Beach, Florida, as a dealer/installer. Known for its expertise and experience in marine air conditioning, refrigeration and watermaker systems sales, installation and service, Ice Marine now will offer the RiteAire Marine Whole Vessel Dehumidification System to its clients in the Palm Beaches/Stuart, Florida area.

"We at Ice Marine prefer RiteAire Marine dehumidification systems above all others because they offer a comprehensive, whole-boat solution. They have perfected both the science and artistry of maintaining a comfortable, dry yacht interior. The best part however is the customer doesn't notice the system working – they simply experience a consistently dry, comfortable onboard environment," said Ice Marine President Marc Pittington.

#### **About RiteAire Marine**

*Since 2013, **RiteAire Marine** has installed its patented Whole-Vessel Dehumidification System in hundreds of yachts from 50' to 120'. The owners and captains of these vessels rely on their yachts' RiteAire system to keep the interior dry, fresh-smelling, and free of mold and allergens even in the most humid regions. Highly respected marine dealerships and world-class yacht manufacturers recommend the RiteAire Marine system to their customers. Since 2024, RiteAire Marine has been a standard option on all new Viking Yachts. For more information, visit [riteairemarine.com](http://riteairemarine.com).*
