

## **PRESS RELEASE:**

### **De Antonio Yachts Opens Its New Corporate Headquarters in Barcelona**

Barcelona, March 3, 2026 – De Antonio Yachts announces the opening of its new corporate headquarters in the upscale Pedralbes neighborhood of Barcelona. The new facility, inaugurated on March 2, is located in a 1936 tower house on a nearly 2,000 m<sup>2</sup> landscaped plot, perfectly connected and surrounded by an environment that reflects the essence and values of the brand.

This new chapter represents far more than a change of location. With the inauguration of De Antonio Yachts Casa Barcelona, the company showcases its strong phase of growth and expansion. It is a natural evolution that accompanies the development of the brand, its team, and its future vision.

The new headquarters has been designed as a space that fosters creativity and teamwork, with specialized areas and communal zones that encourage interaction and align every team with the brand's essence. More than just offices, it is a place where a culture of wellbeing, environmental care, and conscious habits thrives, and where a variety of activities will inspire the team to grow, collaborate, and advance together. At the same time, De Antonio Yachts Casa Barcelona aims to become a sustainability hub within the brand's ecosystem, reflecting its commitment to the environment, people, and responsible innovation.

Furthermore, this new space becomes the heart of the De Antonio Yachts universe, a place where boat owners, partners, and sailing enthusiasts can connect, share experiences, and live the brand at its fullest—through private events, collaborations with other brands, music, and gastronomy. Every corner is designed to inspire, foster authentic relationships, and strengthen community bonds. It is also a major step forward for the De Antonio Yachts Club, with its exclusive memberships, offering members unique experiences and privileged access to events, establishing a dynamic environment where people, ideas, and passions converge to shape the future of sailing.

The new headquarters is equipped with cutting-edge technology to provide virtual reality experiences both for the design teams during the conception and development of new projects and for clients, offering an immersive visualization experience to discover upcoming models in development.

In short, as Marc de Antonio, CEO and co-founder of the company, notes, "This is a space where ideas are transformed into tangible projects, creativity turns into real achievements, and the team's effort drives growth and secures the brand's future."

This new space will allow the company to continue growing without losing its identity, maintaining intact the values that have defined De Antonio Yachts since its inception.
