

## **Overlook Marine Group Announce Strategic Investment in Admiralty Yacht Sales (“AYS”)**

Overlook Marine Group is pleased to announce a strategic investment in Admiralty Yacht Sales, further strengthening the group’s growing presence along the East Coast of the United States.

Effective February 23, this investment marks an important step in the continued expansion of Overlook Marine Group, particularly within the Florida market. “By combining resources, industry expertise, and market reach, the transaction is designed to enhance the services and support available to both wholesale partners and clients throughout the region”, said Magnus Lejdstrom, CEO and Founder.

As part of this expansion, **Jason Lash**, formerly of AYS, will lead the group’s Florida operations. Jason will oversee both the wholesale and brokerage divisions, bringing his deep industry knowledge, long-standing relationships, and leadership experience to help drive continued growth and client service across the state.

This strategic alignment represents a strong combination of teams and capabilities, allowing the group to deliver enhanced market coverage, expanded inventory access, and improved support for buyers, sellers, and industry partners.

The deal also expands the company’s physical footprint in Florida. In addition to the existing locations in **Stuart** and **Fort Lauderdale**, the group will take on the office of AYS in **Delray Beach**, further strengthening its ability to serve clients throughout South Florida.

Overlook Marine Group have known AYS and Jason Lash for many years and have long respected the reputation they have built in the marketplace. “The companies are excited to welcome Jason and his team and look forward to building on that foundation together”, Said Brett Shane, VP Head of Sales, Co-founder.

This combination reflects a shared commitment to delivering exceptional service, expanding market opportunities, and continuing to grow a leading platform for yacht brokerage and wholesale distribution throughout the region.
