

FOR IMMEDIATE RELEASE – April 16th, 2026

Teakdecking Systems Named Official U.S. Distributor of MarineCork

Sarasota, FL – Teakdecking Systems (TDS), the global leader in marine decking solutions, is proud to announce that it has been appointed the official distributor of MarineCork products in the U.S. This strategic partnership marks a significant step forward in expanding access to sustainable, high-performance decking materials within the U.S. marine market.

Through this agreement, TDS will exclusively distribute MarineCork’s advanced cork-based decking systems, providing boatbuilders, shipyards, and owners with an environmentally responsible alternative that delivers durability, comfort, and refined aesthetics without compromising performance.

This partnership reinforces TDS’s ongoing commitment to sustainability and responsible material innovation. As the marine industry continues to evolve, the demand for renewable and lower-impact materials is increasing. MarineCork’s cork-based solutions derived from a naturally renewable resource align closely with TDS’s mission to offer environmentally conscious decking options alongside its traditional teak and composite systems.

“We are proud to partner with MarineCork and bring their cork decking to the U.S. market,” said Richard Strauss, CEO of Teakdecking Systems. “Sustainability is becoming a central priority for our industry, and this partnership allows us to offer a product that not only reduces environmental impact but also delivers the quality, comfort, and longevity our customers expect. MarineCork is a natural fit within our portfolio as we continue to expand responsible alternatives for modern vessel design.”

“The partnership with TDS, the exclusive distributor of MarineCork products in the United States, marks an important step in strengthening our position in a strategic region for the marine industry. We selected TDS as our partner because it is a recognized reference in the sector, with proven experience in high-end decking solutions and a strong focus on sustainable materials,” says Sandro Serena, CEO of SACE Components. “We share the same approach to cork-based solutions, ensuring comfort and long-term performance, while enhancing onboard spaces through customizable surfaces.”

Founded in 1983, Teakdecking Systems is an employee-owned company and the premier supplier of teak, composite and cork decking systems. With facilities in Florida and Spain, TDS provides high-quality decking, repair, and maintenance products including caulk, epoxy, cleaners, and adhesives available through national and global distributors. TDS continues to set the industry standard for craftsmanship and innovation.

MarineCork's cork technology offers a unique combination of sustainability and performance. Naturally renewable and harvested with minimal environmental impact, cork provides excellent thermal and acoustic insulation, a soft and comfortable underfoot feel, and long-term durability in demanding marine environments. Its customizable surfaces also allow designers to create sophisticated onboard spaces that reflect contemporary yachting standards while supporting environmentally conscious choices.
