Introduction

The Sustainable Development Goals (SDGs) are more critical today than ever and especially in the United States. Amidst a confluence of challenges—including the COVID-19 pandemic, climate crisis, and deteriorating trust in institutions—the SDGs offer a foundation for responding to the needs of communities and building an inclusive, resilient future where no one is left behind. This resource library is part of a larger project in partnership between the UN Foundation and the Brookings Institutions’ Center for Sustainable Development focused on building American leadership on the SDGs.

The SDG framework is an agenda for action, but the process for getting started and what it means in practical terms to implement the SDGs is often less clear, particularly in the United States. This library is a living collection of key resources, tools, and examples of U.S. implementation from across sectors. It was created to provide U.S. actors a starting point and practical resources to embark on or further develop their own SDG efforts and should not be viewed as comprehensive.

We hope you will find these resources instructive on your path to bringing the SDGs home to your community. We encourage you to check back as the library continues to grow and to share your resources and best practices so others can benefit as well.

If you have additional resources to share, please email Krista Rasmussen at krasmussen@unfoundation.org.
Voluntary Local Reviews

Voluntary Local Reviews are a vehicle for reporting progress and action toward achieving the SDGs that have been used by city and regional governments, universities, and other sectors. To date, at least 75 cities and regional governments around the globe have published a VLR, including in the U.S. The process is modeled on and complements the Voluntary National Review (VNR), which UN member states use to present their SDG progress and alignment at the UN during the annual High-Level Political Forum. In some countries, the VNR incorporates findings from subnational assessments. Unlike the VNR, the VLR has no official or universally accepted standards guiding the process.

While city and municipal governments have largely led the VLR process, universities have adapted this tool to track their own SDG efforts through Voluntary University Reviews (VURs).

RESOURCES

Voluntary Local Review Declaration
New York City

In 2019 at the UN General Assembly, New York City launched the Voluntary Local Review Declaration for local and regional governments worldwide to formally commit to reporting on the SDGs at the UN. More than 330 local governments have joined the declaration, including Los Angeles, Orlando, and Rochester Hills.

Learn more
Global guiding elements for Voluntary Local Reviews
UN Department of Economic and Social Affairs

This resource identifies key themes and common elements across VLRs to support local and regional governments in producing their own. It highlights the VLR as a tool for peer-learning and emphasizes building a low threshold for entry in order to maintain inclusive processes.

Learn more

A comparative analysis of existing Voluntary Local Reviews
UN-Habitat and United Cities and Local Governments (UCLG)

This study provides an overview of methods used across current VLRs, best practices, and recommendations for others looking to start the process.

Learn more

Next Generation urban planning: Enabling sustainable development at the local level through voluntary local reviews (VLRs)
The Brookings Institution

City leaders increasingly see the value in "globalizing their local agenda," with VLRs becoming tools to connect local efforts with global communities. The Brookings Institution explores VLRs as a tool for urban planning by presenting a city-specific perspective informed by the experiences and viewpoints of cities that have completed a VLR. The report also outlines innovations for future iterations of the VLR, specifically focusing on issues that support its expansion worldwide.

Learn more

Leading locally: the origins and impact of the Voluntary Local Review
New York City and UN-Habitat

Reflecting on the early days of the Voluntary Local Review Movement, New York City and UN-Habitat highlight experiences leading to the start of a global effort on localizing the SDGs. The report includes
reflections of best practices and lessons learned from SDG leaders, including the mayors of Los Angeles, Buenos Aires, and Bristol. Learn more

IMPLEMENTATION EXAMPLES

CITIES / STATES

New York City
In 2018, New York City was among the first cities in the world to report directly to the UN on its SDG implementation. New York City’s VLRs are prepared by staff within the Mayor’s Office for International Affairs in partnership with the Mayor’s Office of Operations who together gather and integrate inputs from across the city government for the report. The city’s comprehensive strategic plan, OneNYC 2050, also integrates SDG indicators to measure progress and feeds into its VLR.
New York City Voluntary Local Review 2018
New York City Voluntary Local Review 2019

Hawaii
In 2020, Hawaii became the first state in the United States to conduct a statewide VLR, which includes an assessment of progress across all four counties. Hawaii Green Growth Local2030 Hub led the effort in collaboration with partners from government, business, and civil society, using a consultative and locally driven process to identify shared priorities and measure what matters locally. The VLR is informed by the Aloha+ Dashboard, an open-data platform measuring Hawaii’s progress toward all 17 SDGs.
Hawaii Voluntary Local Review 2020

Los Angeles
Los Angeles conducted its first VLR in 2019, which highlights initiatives in place to address 8 of the 17 SDGs, including two priority goals for the city, SDG 5 (Gender Equality) and SDG 11 (Sustainable Cities and Communities). The VLR results from a collaboration with local universities to localize the SDGs for the city, including identifying
relevant targets and indicators, and mapping activities and policies to the SDGs. It is informed by the city's SDG Data Reporting Platform, which tracks progress across the SDGs at the indicator level. The 2021 VLR uses an interactive website in addition to a downloadable report. Los Angeles Voluntary Local Review of progress in 2019 Los Angeles Voluntary Local Review of progress in 2021

**Orlando**

Orlando is the fourth city and fifth locality in the U.S. to complete a VLR. The 2021 VLR was launched in partnership with ICLEI - Local Governments for Sustainability and reports on Orlando's contributions and quantitative progress on 9 SDGs. It builds on the city's development plan, which focuses on clean energy, transportation, and water. In 2022, the city collaborated with the University of Central Florida to launch an SDG dashboard showcasing the city's progress towards each SDG. Orlando Voluntary Local Review 2021

**Pittsburgh**

In November 2020, Pittsburgh released its first VLR, which was produced through a phased approach that included scaling the SDGs for the local context and mapping the alignment of current city activities with the SDGs. The city organized roundtable discussions with city employees to identify local priorities. The VLR reports on efforts across all 17 SDGs and is designed as a baseline for future comparison as efforts continue. Pittsburgh's second VLR in 2021 outlines the city’s framework for sustainable procurement and maps city contracts and procurement initiatives to the SDGs. Pittsburgh Voluntary Local Review 2020 Pittsburgh Voluntary Local Review 2021

**UNIVERSITIES**

**Carnegie Mellon University**

In 2020, Carnegie Mellon University (CMU) published the first-ever Voluntary University Review (VUR) modeled after the VLR. A team of faculty, staff, and students led the process, which reviewed how CMU’s teaching, research, and practices aligned with the SDGs using desk
research, interviews, and community consultations. This approach offers a useful model for other higher education institutions. CMU released its second VUR in 2021 using an interactive format.

Carnegie Mellon University Voluntary University Review 2020
Carnegie Mellon University Voluntary University Review 2021

University of California, Davis
UC Davis released its VUR in 2021, the culmination of collaboration between the global affairs, sustainability, and diversity, equity, and inclusion units. With four goals – measuring progress in addressing the SDGs; building awareness; inspiring involvement and collaboration; and informing future programs and projects – the VUR maps initiatives and courses to the SDGs and pinpoints new opportunities for campus engagement on the Goals.

UC Davis Voluntary University Review 2021

Auburn University
Launched in 2021, Auburn’s VUR showcases the university’s SDG engagements between 2016 and 2018, specifically focusing on the metrics of teaching, research, and outreach. The report was a collaborative project between several offices and academic departments and will be used to inform future strategies geared towards building SDG action across the campus.

Auburn University Voluntary Local Review 2021
17 Rooms

17 Rooms is an experimental approach to convening and problem-solving for the SDGs developed by the Center for Sustainable Development at the Brookings Institution in partnership with The Rockefeller Foundation. In practical terms, 17 Rooms participants meet in “Rooms,” or working groups, to identify cooperative actions they can take over the next 12-18 months to make progress on an aspect of an SDG. Emerging ideas are shared between rooms to spot opportunities for collaboration. The process generates a mix of expert-driven insights plus momentum for practical action.

The 17 Rooms initiative has evolved on two tracks: an annual global flagship process focused on international scale policy challenges, and a widely accessible methodology for bottom-up SDG problem-solving at a grass roots level (dubbed “17 Rooms-X”). The 17 Rooms Secretariat recently launched a “17 Rooms-X Community of Practice” with dozens of organizations, including universities, cities, and civil society organizations, joining to share insights on how 17 Rooms can help tackle local economic, social, and environmental issues.

RESOURCES

IMPLEMENTATION EXAMPLES

17 Rooms Annual Flagship Event
On the sidelines of the 2018 UN General Assembly, the Brookings Institution and the Rockefeller Foundation launched the 17 Rooms initiative to channel collaborative energy and ideas into practical steps toward reaching the SDGs. The event has turned into an annual event, which in 2020, was adapted into virtual convenings with a focus on actions toward building back better from the COVID-19 pandemic through the SDG framework.

Great transitions: Doubling down on the Sustainable Development Goals, 2020
Coming together: Forging new paths to action for the Sustainable Development Goals, 2021

17 Rooms-U @ Georgia Tech
Universities have led the way in piloting their own “17 Rooms-U” efforts around the country, such as the “17 Zooms” event held at Georgia Tech in 2020. Each room included a mix of faculty, staff, and students who identified ideas for advancing their corresponding SDG at Georgia Tech. These were compiled into a report of 56 key takeaways. The report includes a description of each recommended action, connections to the university's strategic plan, and an estimate of required resources.

Georgia Tech 17 Rooms – Recommended actions
17 Rooms-U @ George Mason University
In 2021, George Mason University’s Institute for Sustainable Earth (ISE) and the Better World Center coordinated a 17 Rooms-U event for students, staff, faculty, and other university stakeholders. GMU held 3 preparatory convenings before a larger gathering in October 2021. After the 17 Rooms-U summit, GMU announced winners of seed funding awards, with many of the selected projects addressing at least one SDG.
Learn more

17 Rooms @ Carnegie Mellon University
Carnegie Mellon University used the 17 Rooms exercise as a foundation to bolster stakeholder engagement for its 2020 Voluntary University Review. Over the course of two weeks, students, faculty, and staff met virtually to explore ongoing campus-led actions that correspond with a particular SDG.
2020 Voluntary University Review

17 Rooms @ Central Florida Regional Partners
Under the theme “Partnership for the Goals: Creating a Resilient and Thriving Community,” the 17 Rooms exercise brought dozens of local leaders together in conversation on a specific SDG, including partners from the Central Florida Foundation, City of Orlando, and the University of Central Florida.

Data Dashboards

Tools like interactive trackers and dashboards bring the SDGs to life by allowing individuals to visualize data and access measurements of progress, often in real time. These tools encourage public engagement in their community’s work on sustainable development while also providing means for accountability. The data can also help to drive decision making and identify gaps and areas of need. Interactive dashboards are increasingly incorporating narrative storytelling alongside quantitative metrics. They also can layer disaggregated data that captures characteristics like gender, race, and age, as well as geographic and location specific data to add further insights.

RESOURCES

Open SDG
Open SDG is an open source platform for communities of all sizes to gather, disseminate, and track data related to the SDGs. It is the result of a collaboration between the UK Office for National Statistics, the U.S. government, the nonprofit Center for Open Data Enterprise, and members of the Open SDG community. It is built exclusively with open-source libraries and tools, and can be hosted and maintained using free services.

Blog: Open Source SDG Data Reporting for Local Governments, 2020
IMPLEMENTATION EXAMPLES

Aloha+ Dashboard and Aloha+ Goals Scorecard
The Aloha+ Dashboard tracks Hawaii’s progress across the SDGs and is organized into six priority areas using community-driven metrics. The metrics were co-developed through a four-year stakeholder engagement process facilitated by Hawaii Green Growth. The dashboard tracks over 280 indicators using both narrative descriptions and quantitative trends to inform statewide and county-level decision making. Community working groups continue to update the data, identify new metrics, and establish priorities based on trends revealed by the dashboard.

Aloha+ Challenge Dashboard

SDG Funders and SDG Indicator Wizard
Candid

SDG Funders is the most comprehensive dataset on how philanthropic investments align with the SDGs. The dashboard displays funding by goal, region, country, and population group, including over $170 billion from U.S. funders since 2016. The accompanying Indicator Wizard identifies which SDG targets and indicators are related to an organization’s strategic priorities, objectives, and mission statements.

SDG Funders

Los Angeles SDG Activities Index
The SDG Activities Index is an open source, online encyclopedia of people and organizations doing work to advance the SDGs in Los Angeles. Users can filter projects and organizations by their alignment with individual SDGs to learn about ongoing work and opportunities for collaboration. The dashboard was developed with the Center for Open Data Enterprise.

LA’s SDG Activities Index
Localizing the Goals and Measuring Progress

The ability to track performance and target resources effectively is the backbone of the SDGs. But oftentimes indicators and other tools to measure progress do not easily translate to communities’ or non-national entities’ realities and priorities. As a result, localizing the SDGs has evolved from directly implementing SDG national targets and indicators to adapting and modifying the targets and indicators to fit the unique context and setting. Communities, businesses, foundations, and universities are developing methods to localize the SDG framework to best measure their progress on the SDGs.

RESOURCES

The Local Data Action Solutions Initiative
Sustainable Development Solutions Network (SDSN)

SDSN’s Local Data Action Solutions Initiative aims to identify and promote replicable methods for sub-national SDG monitoring that facilitate local action. It includes a library of case studies on how to monitor and implement the SDGs at the city and regional level.

Accelerating education for the SDGs in universities: case studies
SDSN

Universities in the United States and around the world are finding creative ways to embed the SDGs in their courses, research, and
community activities. This collection of case studies offers tangible examples of how universities are advancing the SDGs with a particular focus on how they are helping learners develop the skillset to solve complex challenges at the heart of the Goals.

**Education for SDGs**

**Localizing targets and indicators for cities**

**Los Angeles**

To support implementation of the SDGs, the City of Los Angeles worked with four universities to localize the framework for its context. They developed a methodology for assessing the applicability of SDG targets for its community and offered revisions that preserved the target's original intent. They also explored ways to add local context and priorities, for example adding new indicators to understand disparities faced by LGBTQ+. This process led to the targets and indicators used in the Los Angeles Data Reporting Platform and Voluntary Local Review.

**Why localization matters: Implementing the SDGs in Los Angeles**

**Los Angeles SDG Data Reporting Platform**
Leaving No One Behind

The central ambition of the SDGs is to leave no one behind. This rallying cry is especially critical for the United States today, as it responds to and recovers from the COVID-19 pandemic, addresses climate change, and confronts racial and other social inequities. Ensuring no one is left behind requires a collective effort on issues like poverty, hunger, inequality, environmental resilience, and education that are all included in the SDG framework. Actors around the country are using the SDGs to understand and address systemic barriers and build more resilient and equitable societies.

RESOURCES

Never more urgent: A preliminary review of how the U.S. is leaving Black, Hispanic, and Indigenous communities behind
SDSN

This report uses the SDGs as a tool to evaluate how well the United States and individual U.S. states serve Black, Hispanic, and Indigenous communities compared to white communities. It reveals that the biggest disparities are across five major areas: justice, food and housing security, education, economic security, and health.
