

ZYPLINE releases ZPage -- a powerful new tool that enables billions of MSMES publish an online business page with just using their mobile number.

Now the entire global market segment of billions of service providers, small contractors, home businesses and freelancers can have a valuable webpage for display and flyer e-commerce without the expense or technical support requirements of a conventional website.

ZPAGE TURNS MOBILE PHONE NUMBERS INTO ONLINE ADDRESSES AND CREATES AN INSTANT WEBPAGE FOR INDEPENDENT CONTRACTORS AND HOME BUSINESSES AROUND THE WORLD

ZPage is the world's simplest internet-posting system, it directly uploads any document in any format and establishes the user's mobile number as the online locator and URL. This simple approach addresses the large global market of billions of independent contractors, a large portion of which is "tech-hesitant", or resource constrained and therefore cannot easily use the benefits of online display in their marketing.

**Every small business or service provider is asked: "Do you have a website?"
The customer is really asking: "How can I learn more about you before I contact ?"**

ZPage enables small businesses to give shoppers the information they want without needing to build a conventional website, without depending on anyone else, and without even needing the internet. It gives the user total control of content, and their mobile number URL webpage address never expires. Here is a 90 sec introductory video: <https://bit.ly/3akPOfx>

The information that a customer wants – business profile, product or service details, prices, contact information, hours and area served can be provided with a single page on **Zpage**, eliminating the need to invest in a full website. Everyone asks for a 1-pager about your project or business; it's now required for creditbilty. Soon everyone will ask, "Do you have a **ZPage**?"
