

Data in the FAIR Health benchmark modules are organized by “geozip,” a geographic area generally defined by the first three digits of a zip code or in some cases, groupings of 3-digit zip codes. The table below and on the following pages includes the 493 geozipt used in most FAIR Health benchmark modules. (The Inpatient modules use different geographic groupings.)

If you have questions, please contact **FAIR Health Support** at **(800) 373-3073**, e-mail support@fairhealth.org or log a service request on the client portal at <http://client.fairhealth.org>.
