Sheet music[edit | edit source] The only way to get Obsidifish and Flarefin Koi is to fish for lava. On the Desktop version and mobile version, any fishing pole can fish lava using Lava Critters caught in the underworld or having a lavaproof Hook equipped. Hotline Hook can still be used for fishing lava in any feed in all versions, however. Chum Caster increases the chance of hooking the enemy during Blood Moon 1/6-to 1/3. The color line can be changed by supplying a string of vanity slots. Achievements[edit | edit source] Hot Reels! • Throw the lure of the lava pool into a pre-fried haul! Use any fishing is not in the lava. Trivia[edit | edit source] Since golden fishing rod can not be used for fishing lava, the best possible fishing for lava is a little less efficient than the best fishing in the water.
