

Dear Nonprofit Colleague,

The *Grant Application—Short Form* was developed by a task force of Ohio Grantmakers Forum (OGF) as part of a series of statewide common grant forms. OGF and its members created this form to make the grant seeking process simpler and more efficient for nonprofits.

Please keep in mind that every funder has different guidelines and priorities, as well as different deadlines and timetables. **Before submitting this application to a potential grant maker, it is very important that you check to see whether your project or program matches their published interests.** Any funder that has agreed to accept this form may request additional information as needed. In addition, a funder may require that a grant seeker complete the longer *Grant Application*. Please check with the funder which form they require.

STRATEGIES FOR SUCCESSFUL GRANTSEEKING

1. **Do your research** to determine whether the foundations' and corporations' goals and objectives for grantmaking are consistent with your type of grant request.
2. After you do the research, find out the preferred method of contact for the grant maker, and contact the grant maker to secure their specific grantmaking guidelines. Many funders generally like to have initial contact with you before receiving a written proposal.
3. Complete the letter of inquiry for those funders that require that form BEFORE completing this common application. The funder's guidelines will state whether a letter of inquiry is required or not.
4. Include a cover letter with each proposal that introduces your organization and your proposal, and makes a strategic link between your proposal and the funder's mission and grantmaking interests.
5. Provide responses that are typed, single-spaced, single-sided and use a 12-point type.
6. Answer all the questions in each section, UNLESS otherwise indicated by the funder. At the funder's discretion, you may answer the questions individually or group them into one narrative for each section (*for Sections Two to Six*).
7. Submit the number of copies each grant maker requests according to their guidelines.
8. Do not include any materials other than those specifically requested at this time.
9. If completing an online application, you are strongly encouraged to fill out and save the Microsoft Word version of the common grant application—short form on your computer. Then proceed to cut and paste the requested information into the funder's online application.

The Common Grant Application is a collaborative effort of funder and nonprofit organizations working to build the performance capability of the nonprofit sector in Ohio.

GLOSSARY

Capital Request – A planned undertaking to purchase, build or renovate a space or building, or to acquire equipment.

In-Kind Support – A contribution of equipment/materials, time, and or services that the donor has placed a monetary value on for tax purposes.

Methodology – A sequence of activities needed to accomplish the program objectives.

Operational Support – A grant given to cover an organization’s day-to-day expenses such as salaries, utilities, office supplies, etc.

Outcomes – The changes in (or benefits achieved by) individuals or communities due to their participation in program/project activities. This may include changes to participants’ knowledge, skills, values, behavior, or condition of status. In general, outcomes are described in quantitative or qualitative terms.

Quantitative (or Measurable) outcomes are changes or benefits that can be measured or counted and expressed with a numerical value. For example, 30 of the 40 third-grade students participating in the literacy program will increase their reading level by one grade level.

Qualitative outcomes are changes or benefits that refer only to the characteristics of something being described, rather than exact numerical measurement. Qualitative changes can be observed (or detected through the senses) and are generally described in a narrative form. For example, the mother of a student participating in the literacy program stated that her daughter no longer feared reading aloud in class now that she could read at the same level as her classmates.

Program – An organized set of services designed to achieve specific outcomes for a specified population that will continue beyond the grant period.

Project – A planned undertaking or organized set of services designed to achieve specific outcomes that begins and ends within a specified time period. (A successful project may become an ongoing program.)

Technical Assistance – Operational or managerial assistance given to a nonprofit organization. It may include fundraising assistance, budgeting or financial planning, program planning, legal advice, marketing or other aids to management. Assistance may be offered directly by a foundation or corporate staff member or in the form of a grant to pay for the services of a consultant.
