

This deposition will be taken by a stenographer as well as recorded by video by the court reporter using Zoom's recording function, which will be considered the official video copy for the record. Counsel for Plaintiff and Counsel for Defendant _____ will be attending via Zoom video conference. As the court reporter will also be attending remotely, the deponent will be sworn in remotely pursuant to _____ [I would insert the KY SCt Order and/or recent legislation permitting this].

The official video recording by the court reporter will lock or "Spotlight" the screen of the deponent so that the video recording equipment will remain stationary at all times on the witness pursuant to CR 30.02(4)(b). However, if documents are shared electronically, it will be side-by-side with the witness so that the witness can always be seen on the recording. CR 30.02(4)(b) does permit video recordings to display exhibits or other pieces of demonstrative proof. Finally, as this will be a video deposition, all objections will be reserved and shall not be stated on the video recording except for objections relating to the form of the question pursuant to CR 30.02(4)(e).
