Legal Nurse Consultant**

I work remotely in my home office help attorneys save time and money with medical record review and summary (chronologies). I have over 20 years' experience assisting attorneys with any type of case involving medical records (personal injury, medical malpractice, wrongful death, elder abuse, sexual abuse, employment law). I can also create billing summaries and screen cases for merit.

**How to get medical records to me?** Records can be sent electronically via email or drop box. I can also accept records sent via Fed Ex, UPS and mail.

CAALA attorney references are available upon request.
