

Based on over 40 years of trial experience, including more than 130 jury trials and thousands of case files and mediations, while listening to colleagues around the country, we are presenting a first ever “drill down” analysis of trial lawyers’ pitfalls from case intake to trust account disbursement. There is plenty of room for error in the progression of any case. The purpose of this one-day seminar is to share experiences common within our practice, but often not talked about.

In essence, this is a “dodge the bullet” seminar which primarily deals with practice tips on how to avoid common and not so common mistakes. There is also an emphasis on “new problems” created by computer technology and advances in trial and pre-trial case preparation. You will not want to miss the compilation of trial lawyer pitfalls that can be avoided starting today.
