## Mennel Maintenance Apprenticeship:

Are you interested in an entry-level technician or lead position at Mennel? Then the Maintenance Apprenticeship program may be right for you!

*Learn and earn with Mennel's Maintenance Apprenticeship program.*

We are looking for high school graduates or community college/tech school graduates who reside in, or adjacent to, the counties in which we operate. It's the best of both worlds. Mennel pays your salary as well as your schooling (coursework with a letter grade of "C" or better).

The 90-day introductory period for the Apprenticeship program runs over the summer months of June, July and August. During the first year, Maintenance candidates will spend time in core curriculum classes with a focus on electrical and fundamentals of the maintenance department. Year two will include advanced electrical and welding courses.

It's not all about the classwork, however. On-the-job training and job shadowing responsibilities are key benefits of the program. Apprentices work full time at an assigned Mennel facility, gaining real-world, practical experience.

To learn more, contact Mennel's Recruitment team at [hr@mennel.com](mailto:hr@mennel.com) or 419-435-8151, Ext. 95131. Visit us online at [mennel.com/careers](http://mennel.com/careers) today!

At Mennel, we are doing our part by keeping the world *"perfectly balanced"* for baking and beyond.
