

Mennel Wet Wheat Program 2018

We will accept up to 23% moisture wheat from producers.

We will have a shrink only discount with no drying charges to apply.

The test weight of the wheat will be adjusted to reflect the test weight when the wheat is dried to 13.5% moisture. This adjustment will be determined when we know the characteristics of this year's crop.

Normally this program lasts a short period of time, 10 to 14 days, and will be discontinued when we believe under normal conditions the wheat will be dry out of the field.

If you have any questions, please call.
