The free version of Lightroom, which is available for iPhone and Android, is extremely powerful, and many of the same features on the lightroom desktop version can be found on the mobile version. Mobile Lightroom preses are very popular with social media influencers because preses allow them to create a more user-friendly and personalized view of their social posts. We are working with Influencers to create their own Lightroom packages that they can give away or sell to their audience. Look below where we have preses for all types of photos, please be sure to tell us what you think of them, leaving a review at the bottom – thanks! What is Lightroom?Lightroom is a very popular piece of software created by Adobe for photographers, allowing them to perform 3 functions. You can use it as an image library tool to manage and organize all your photos, you can also use it to design and edit these photos in JPG or RAW format and finally it is to export those images. Lightroom Presets provides an ideal workflow automation opportunity for professionals and enthusiasts. That Lightroom Presets When you edit your photos in Lightroom in the Development module, you can create different effects and styles by changing many variables such as exposure, contrast, color, tone curve, etc. When you Happy with the look you've created, you can save the settings so you can use them again later in different photos. When you save customizations, a file with the .ltemplate extension is created, and it is known as a style. Ltemplate files are easy to install, we'll show you how to download your preses in your Lightroom app. You can upload presets created by other photographers and use them in your own photos, in Photonify we sell presets collections for many different types of photography styles. You've most likely found us on Google because of the professional designs we provide for both our free preinstalled packages and our premium lightroom presets. How to install Lightroom PresetInstalling presets in Lightroom super simple, just follow these instructions:Open LightroomIn the top menu go to: Edit > Settings Click the Presets tab at the top of the window, and then click on the box titled: Show Lightroom Preset folderThis will open the Windows File Explorer window.
