

Day 73

1. Opener

- a) A 25 foot ladder leans against a wall. It touches the wall 24 feet off the ground. If you slide the base of the ladder back 10 feet on the ground, how far does it slide down the wall?

- b) A pyramid has a base apothem of 8 ft. and a base side length of 12 ft. The triangles that make up its side each have height 40 ft. It's total surface area is 7200 sq ft. How many edges does the pyramid have?

- c) What do you call someone from: Louisiana, Maine, Connecticut, New Jersey, Massachusetts

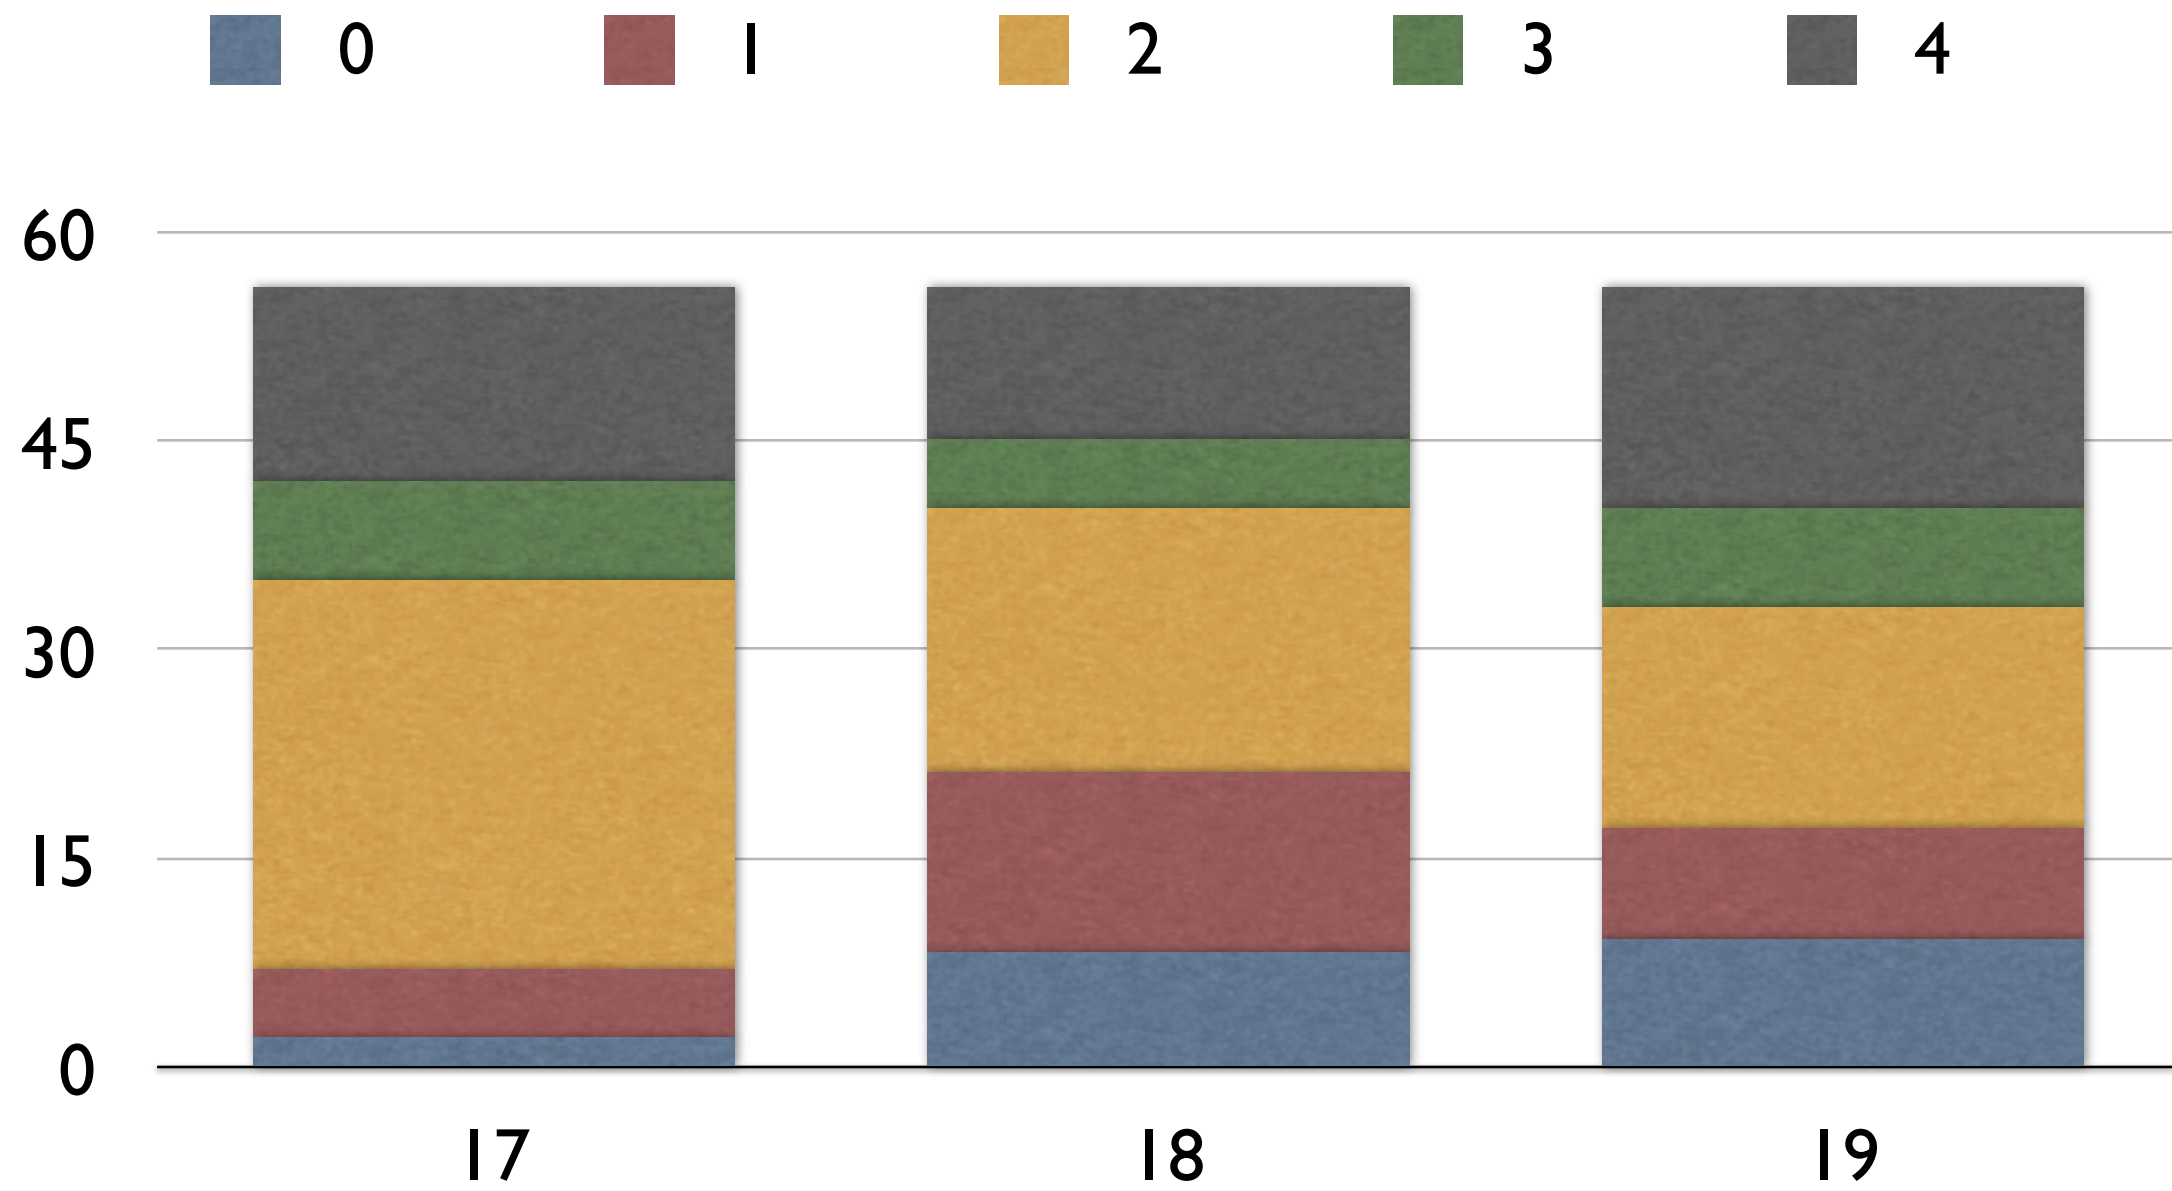

Released Question #43

The sum of the interior angles of a polygon is the same as the sum of its exterior angles. What type of polygon is it?

- A.** quadrilateral
- B.** hexagon
- C.** octagon
- D.** decagon

2. Pythagorean Word Problems

pg. 482 // #1, 2, 4 - 6

2. Pythagorean Word Problems

pg. 482 // #1, 2, 4 - 6

Ask if the baseball bat (34 in.) fits in vertically. Where's the right triangle?

2. Pythagorean Word Problems

pg. 482 // #1, 2, 4 - 6

Didn't get to this.

Day 74

1. Opener

a-b) Find the surface area.

c) What kind of insurance do 4,000,000 Japanese golfers carry?

2. Pythagorean Word Problems

pg. 482 // #1, 2, 4 - 6

Ask if the baseball bat (34 in.) fits in vertically. Where's the right triangle?

Released Question #19

In the figure below, $\overline{AC} \cong \overline{DF}$ and $\angle A \cong \angle D$.

Which additional information would be enough to prove that $\triangle ABC \cong \triangle DEF$.

- A.** $\overline{AB} \cong \overline{DE}$
- B.** $\overline{AB} \cong \overline{BC}$
- C.** $\overline{BC} \cong \overline{EF}$
- D.** $\overline{BC} \cong \overline{DE}$

2. Simplifying Square Roots

$$a^2 + b^2 = c^2$$

$$8^2 + 4^2 = c^2$$

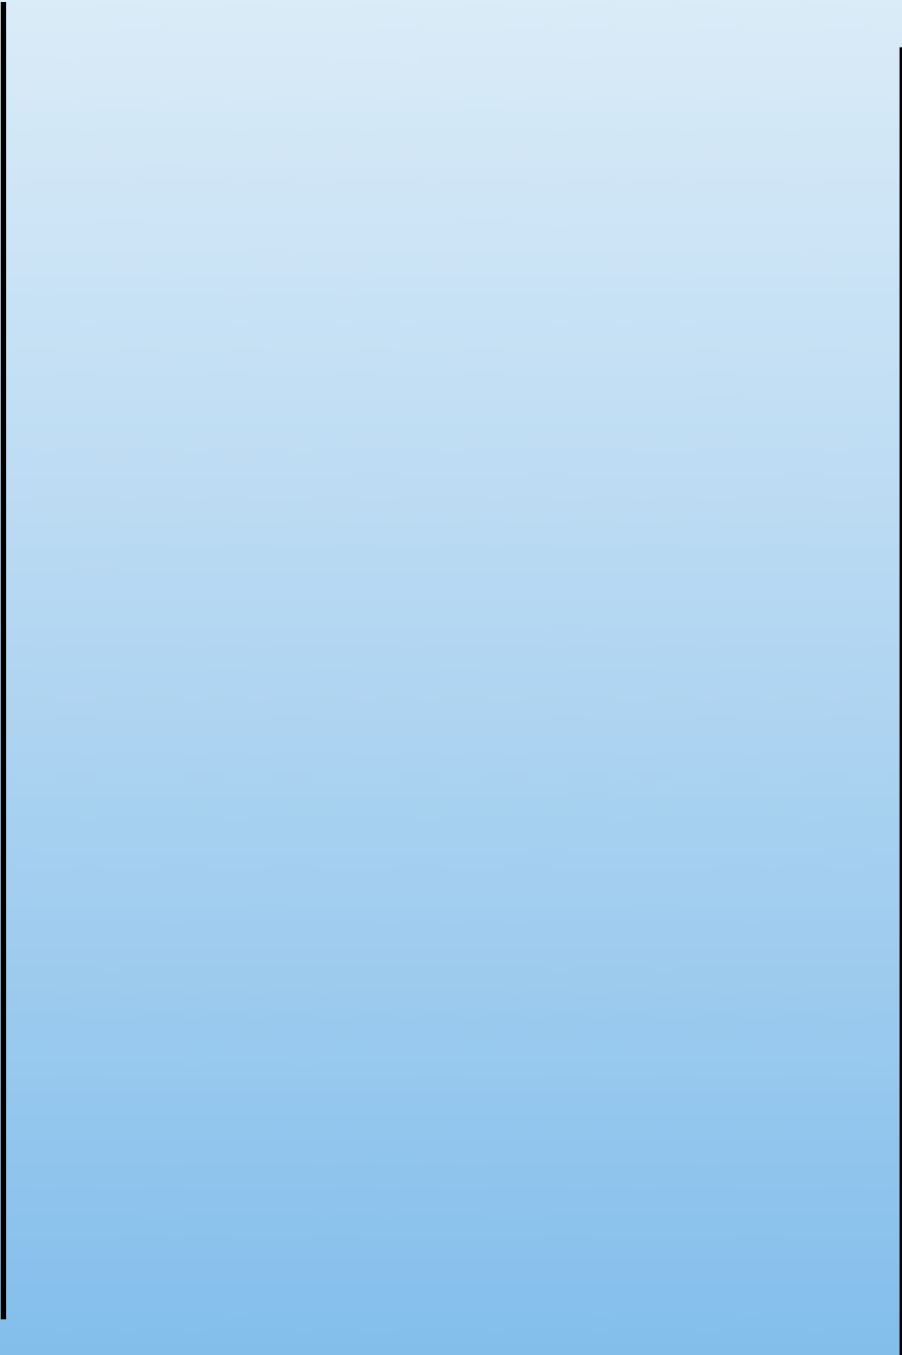

$$64 + 16 = c^2$$

$$80 = c^2$$

$$\sqrt{80} = c$$

$$8.94 = c$$

2. Simplifying Square Roots

$$\sqrt{80}$$
Two vertical black lines are positioned on the page. The first line is located to the right of the expression $\sqrt{80}$, and the second line is further to the right. Both lines extend from the top of the text area down to the bottom of the page.

Squaring is all about making pairs out of numbers. Square rooting is all about getting rid of pairs.

2. Simplifying Square Roots

$$a^2 + b^2 = c^2$$

$$8^2 + 4^2 = c^2$$

$$64 + 16 = c^2$$

$$80 = c^2$$

$$\sqrt{80} = c$$

$$8.94 = c$$

$$4\sqrt{5} = c$$

So here's the alternate answer. Sometimes it's useful to preserve the square root information, as we'll make clear in the next classwork segment.

2. Simplifying Square Roots

$$\sqrt{80}$$

$$\sqrt{75}$$

$$\sqrt{180}$$

2. Classwork - Simplifying Square Roots

1. $\sqrt{18}$

$3\sqrt{2}$

2. $\sqrt{96}$

$4\sqrt{6}$

3. $\sqrt{576}$

24

4. $\sqrt{720}$

$12\sqrt{5}$

5. $\sqrt{722}$

$19\sqrt{2}$

6. $\sqrt{784}$

28

7. $\sqrt{828}$

$6\sqrt{23}$

8. $\sqrt{2952}$

$6\sqrt{82}$

9. $\sqrt{5248}$

$8\sqrt{82}$

10. $\sqrt{8200}$

$10\sqrt{82}$

11. $\sqrt{11808}$

$12\sqrt{82}$

12. $\sqrt{16072}$

$14\sqrt{82}$

13. $\sqrt{20992}$

$16\sqrt{82}$

For #13, tell them you want them to give you both the answer AND the question.

3. Break

4. Show and Tell

I want to know the distance, by air, from Pebble Beach to the Presidio. Each box in the grid is a square mile. (Not true, but let's roll with it for argument's sake.)

5. Distance Formula

Find the distance between $(2, 3)$ and $(7, 10)$.

They'll count squares here.

5. Distance Formula

Find the distance between $(-4, -7)$ and $(6, 5)$.

They'll count squares here too.

5. Distance Formula

Find the distance between $(50, 23)$ and $(74, 30)$.

Here, they can't count squares. So what do you do?

5. Distance Formula

Find the distance between (x_1, y_1) and (x_2, y_2) .

Conjecture #3:

Distance Formula

The distance between points (x_1, y_1) and (x_2, y_2) is:

Classwork:

1. Find the distance between: $(15, 37)$ and $(42, 73)$.
2. Find the distance between: $(-19, -16)$ and $(-3, 14)$.
3. What is the perimeter of triangle ABC given: $A(2, 4)$, $B(8, 12)$, $C(24, 0)$?
4. Is triangle DEF scalene, isosceles, or equilateral given: $D(6, -6)$, $E(39, -12)$, $F(24, 18)$?

6. Classwork

Pythagorean Worksheet

Give what they've done on the last several problems, have them derive the formula.

Day 75

1. Opener

A spider and a fly are at opposite corners of a rectangular room that measures 14 ft. x 7 ft. x 10 ft.

- a) What is the distance between them?
- b) What is the shortest path the spider could take to eat the fly?

- c) What is the only letter that doesn't appear in a U.S. state?

Day 75

1. Opener

A spider and a fly are at opposite corners of a rectangular room that measures 14 ft. x 7 ft. x 10 ft.

- a) What is the distance between them?
- b) What is the shortest path the spider could take to eat the fly?

- c) What is the only letter that doesn't appear in a U.S. state?

Day 75

1. Opener

A spider and a fly are at opposite corners of a rectangular room that measures 14 ft. x 7 ft. x 10 ft.

b) What is the shortest path the spider could take to eat the fly?

10 ft.

7 ft.

14 ft.

7 ft.

10 ft.

c) What is the only letter that doesn't appear in a U.S. state?

Released Question #10

Given TRAP is an isosceles trapezoid with diagonals RP and TA.
Which of the following must be true?

- A.** $RP \cong TA$
- B.** $RP \perp TA$
- C.** $RP \parallel TA$
- D.** RP bisects TA

2. Special Right Triangles

Why are they special?

2. 30 - 60 - 90

The 30-60-90 is one half the equilateral triangle.

2. 30 - 60 - 90

If the small side is 7, what is the largest side? Then Pythagorize them to find the middle side.

2. 30 - 60 - 90

2. 45 - 45 - 90

The 45-45-90 is one half a square.

2. 45 - 45 - 90

2. 45 - 45 - 90

3. Classwork

pg. 477 // #1 - 9, 11

pg. 470 // #1 - 8

pg. 474 // Visual Learning #1 - 2

4. Break

5. Show and Tell

6. Notes - Polyhedrons

Three dimensional shapes made up of polygons.

vertices

edges

faces

6. Notes - Not Polyhedrons

6. Notes - Two Kinds of Polyhedrons

Prisms

Two congruent, parallel bases.

Pyramids

One base and one vertex.

6. Notes - Prism

1. Name all the bases of the prism.

PQR & TUS

2. Name all the lateral faces of the prism.

PTUQ & QUSR & PTSR

3. Name all the lateral edges of the prism.

PT & QU & RS

4. What is the height of the prism?

6

6. Notes - Pyramid

5. Name the base of the pyramid.

GNATPY

6. Name the vertex of the pyramid.

E

7. Name all the lateral edges of the pyramid.

EG & EN & EA &
ET & EP & EY

8. What is the height of the pyramid?

13

6. Notes - Prism

Identify the solids.

- C 9. Die
- F 10. Tomb of Emperor
- H 11. Wedge or
- J 12. Box of bricks
- M 13. Plastic box
- I 14. Ingot of silver
- L 15. Honeycomb
- G 16. Stop sign
- E 17. Moon
- A 18. Can of tuna
- J 19. Book
- H 20. Pup tent.

- A. Cylinder
- one
- quare prism
- quare pyramid
- phere
- riangular pyramid
- octagonal prism
- riangular prism
- rapezoidal prism
- rectangular prism
- K. Heptagonal pyramid
- L. Hexagonal prism
- M. Hemisphere

7. Classwork

pg. 509 // #23 - 35

pg. 496 // #1 - 4, 7 - 14

27. T

28. F, it is only true for some pyramids

29. T

30. T

31. F, it is a sector.

32. T

33. F, the segment has to be perpendicular.

34. T

35. T
