

## How To Store Videos On The Cloud With No SD Cards

For a limited time, EZVIZ mini Wi-Fi camera comes with a one year 7-day cloud recording storage. If you have no SD card installed, you can enable the cloud recording storage feature and you will not lose any video once a motion event occurs.

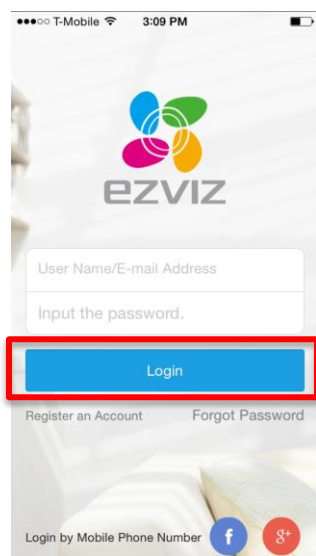

**Follow the steps below to enable the cloud storage recording feature**

**1. Log into your EZVIZ app**

a) Enter your username and password – Click the login tab to log into your account

**2. Click on the device settings tab of the device you want to enable cloud recording**

From the home page locate the device you wish to enable cloud storage and click on the device settings tab on the right side of that device

3. **Scroll down to the storage status tab**
4. **Click on the storage status tab**
5. **In the storage status page, click on the Cloud Storage**
6. **Click on enable to activate**
